REGULATIONS - 2009

CURRICULUM AND SYLLABI - I SEMESTER (FULL TIME)

M.TECH. POLYMER TECHNOLOGY

SEMESTER I

SL. NO	COURSE CODE	COURSE TITLE	L	T	P	C
THEORY						
1.	PL 9311	Polymer Chemistry	3	0	0	3
2.	PL 9312	Science of Polymeric materials	3	0	0	3
3.	PL 9313	Polymer Process Engineering	3	0	0	3
4.	E1	Elective I	3	0	0	3
5.	E2	Elective II	3	0	0	3
PRACTICAL						
6.	PL 9316	Polymer Science Laboratory	0	0	4	2
		TOTAL CREDITS	**15**	**0**	**4**	**17**

ELECTIVES FOR M.TECH. (POLYMER SCIENCE AND ENGINEERING)

SL. NO	COURSE CODE	COURSE TITLE	L	T	P	C
1.	PL 9001	Adhesive science and technology	3	0	0	3
2.	PL 9002	Composites	3	0	0	3
3.	PL 9003	Conducting polymers	3	0	0	3
4.	PL 9004	Engineering plastics	3	0	0	3
5.	PL 9005	Plastic waste management	3	0	0	3
6.	PL 9006	Rubber technology	3	0	0	3
7.	PL 9007	Synthetic resins	3	0	0	3
8.	PL 9008	Industrial management	3	0	0	3
9.	PL 9009	Total quality management	3	0	0	3
10.	PL 9010	Biopolymers and biodegradable polymers	3	0	0	3
11.	PL 9011	Heat, mass and momentum transport processes	3	0	0	3
12.	PL 9012	Reaction engineering	3	0	0	3
13.	PL 9013	Process instrumentation	3	0	0	3
14.	PL 9014	Computer aided design	3	0	0	3
15.	PL 9015	Synthetic fibers	3	0	0	3

PL9311 POLYMER CHEMISTRY L T P C
3 0 0 3

UNIT I FUNDAMENTALS OF POLYMERS 12

Basic concepts of polymer science – classification of polymers – Polymer microstructure-chemical structure and geometrical structure - ladder, star and honey- comb polymers – interpenetrating networks –tacticity – crystalline and amorphous polymers- thermal transitions–glass transition temperature(Tg) - heat distortion temperature.

UNIT II BIO AND INORGANIC POLYMERS 9

Naturally occurring polymers – starch, cellulose, polypeptides – modified cellulose polymers – rayon, cellophane, cellulose acetate, butyrate and nitrate – ethyl cellulose – carboxy methyl cellulose- organometallic polymers - co-ordination polymers - polyamides- Inorganic polymers - phosphorous and nitrogen containing polymers – silicones.

UNIT III CHAIN POLYMERISATION 8

Kinetics and mechanism of free radical, cationic, anionic and coordination polymerisation – stereo regular polymerization - chain transfer reaction and constant –Trommsdorff's effect - living polymers – Alfin catalysts – iniferters.

UNIT IV STEP GROWTH POLYMERISATION AND COPOLYMERIZATION 8

Kinetics of condensation polymerisation – copolymerisation – copolymer equation – composition of copolymers by NMR, IR and UV spectra and chemical methods –monomer reactivity ratios and their significance - metathetical, electrochemical and ring opening polymerisations.

UNIT V MOLECULAR WEIGHT, SOLUBILITY AND FRACTIONATION OF POLYMER 8

Molecular weight of polymers – number, weight and viscosity average molecular weights – polydispersity - molecular weight distribution – determination of molecular weight by GPC and viscometry – polymer dissolution - thermodynamics of polymer dissolution - solubility parameter – fractionation of polymers - reactions of polymers - introduction of new functional groups - cross linking, cyclisation and degradation reactions.

TOTAL: 45 PERIODS

PL9312 SCIENCE OF POLYMERIC MATERIALS L T P C
3 0 0 3

UNIT I 8

Polymer structure – chain structure – micro structure – crystal structure crystallinity – determination of crystallinity, size and orientation of crystallites using x-rays-conformation and configuration- analysis of random flight chain model – application to rubber elasticity - engineering rubbers.

UNIT II **13**

Mechanical properties – deformation of plastic materials- classification of plastic materials based on their stress – strain relationship – effect of temperature on deformation-time dependence and viscoelasticity in solid plastics –models of viscoelasticity – Boltzmann's superposition principle- dynamic mechanical properties – yielding of plastics- aspects of the yield process under tensile stress – crazing and shear yielding – yielding in semicrystalline polymers –mechanical failure in plastics.

UNIT II **6**

Thermal properties –enthalpy –melting and crystallisation – importance of Tg - factors affecting Tg – determination of Tg – thermal conductivity – thermal expansion and contraction - factors affecting thermal expansion .

UNIT IV **8**

Electrical properties –electrical properties at low stress and high stress- breakdown mechanisms – behaviour of dielectric under a.c. field – electrically conductive plastics – electrical applications of plastics.

UNIT V **10**

Melt flow properties - fundamental concepts of rheology – geometry of flow – rheological and viscous behaviour in simple shear - viscous properties of plastic melts in simple shear – measurement of shear properties – cone and plate – concentric cylinder – capillary extrusion viscometer – types of capillary viscometer – factors affecting shear flow – elongational flow – factors affecting elongational flow - melt elasticity.

PL9313 POLYMER PROCESS ENGINEERING **L T P C**
3 0 0 3

UNIT I MIXING DEVICES **8**

Mechanical and kinetics of mixing – different types of mixing devices – two role mixing – internal mixing and screw mixing – twin screw compounding machines – high temperature and pressure mixing devices – powder coating – metallizing – antistatic agents

UNIT II INJECTION MOULDING PROCESS **9**

Components in the injection moulding machines - Injection moulding process analysis – principles of compression and transfer moulding –vacuum moulding – Disc moulding – Moulds - Multi daylight moulds - Mould clamping devices – reaction injection moulding

UNIT III EXTRUSION PROCESSES **9**

Mechanism of flow –Drag flow , Pressure flow, Leak flow - analysis of polymer extrusion process - Basic flow patterns in extrusion die – die exit instabilities – die swell – processing methods based on extruder (Granule production, profile production, film blowing, blow moulding, extrusion stretch blow moulding) – extrusion coating process

UNIT IV SPECIAL MOULDING TECHNIQUES 9

Calendering rolls arrangement and control – methods of sheet forming – matched mould forming –air blowing –vacuum forming techniques – thermo forming –techniques of blow moulding –rotation moulding –plastic finishing techniques.

UNIT V BASIC CONCEPTS IN DIE DESIGN 10

Types of moulds – clamping force – ejection devices – mould cooling –screw standards – feeding devices –CAD / CAM applications.

5. Friedhelm Hansen, Plastics Extrusion Technololgy, Hanser Publishers, Munich, 1988.

PL9316 POLYMER SCIENCE LABORATORY L T P C

0 0 4 2

16

1. Polymer synthesis – bulk, solution, emulsion, suspension and slurry polymerisations - low and high temperature condensation polymerisation, interfacial polycondensation, thermal and redox initiated polymerisations.

2. Kinetics of polymerisation – dilatometry, gravimetry. **10**

14

3. Determination of reactivity ratio of MMA – styrene copolymer – characterisation by TGA, TMA, NMR and IR. Crystallinity of polymers – X-ray diffraction study.

10

4. Molecular weight determination – viscometry, end group analysis, GPC, light scattering, osmometry.

10

5. Fractionation of polymers – Fractional precipitation method – polydispersity

TOTAL: 60 PERIODS

PL9001 ADHESIVE SCIENCE AND TECHNOLOGY L T P C
3 0 0 3

UNIT I ADHESION MECHANISM 9

Definition and mechanisms of adhesion- mechanical interlocking – interdiffusion theories – adsorption and surface reaction. Surface topography, wetting and setting, thermodynamic work of adhesion – influence of constitution on adhesion – interfacial bonding – coupling agents.

UNIT II CHARACTERIZATION OF ADHESIVES 9

Principle of fracture mechanics, peel, Lap sheen and Butt tensile tests. Pull out of an extendable fibre, various testing of adhesives, energy dissipation – plasticity – strength of elastomers.

UNIT III INDUSTRIAL ADHESIVES 9

Inorganic adhesives – animal glues – caesin – starch – cellulosics. Principle of compounding – role of resin – fillers – antioxidants – accelerator systems.

UNIT IV ADHESIVE TYPES 9

Adhesive from natural, butyl, nitrile, styrene – butadiene – carboxylic polymers and neoprene rubbers, polysulphide, phenolic resin, epoxy, polyurethane, polyvinyl acetate, polyvinyl alcohol, polyvinyl acetal, acrylic, high temperature silicone adhesives. Water based – pressure sensitive – hot melt adhesives – anaerobic adhesives

UNIT V APPLICATIONS OF ADHESIVES 9

Adhesives for building construction, medical use, automobile industry bonded and coated abrasives – fabrics, cyanoacrylate based adhesives, bonding technology for textile, metal, plastics, wood, paper and glass.

TOTAL:45 PERIODS

REFERENCES

PL9002 COMPOSITES L T P C
3 0 0 3

UNIT I INTRODUCTION 8

Introduction –Characteristics, advantages, and need of composites – classification – particulate, fibrous and laminated composites, hybrid composites, CCCs, nanocomposites. Woven, knitted and braided materials, flexible composites. Advanced composites.

UNIT II MATERIALS 10

Fibers-Glass –Types-E, S, C and D glasses. Rovings, yarns, CSM, surface mats, performs, woven and non woven fabrics-Production, Properties and applications. Carbon –Precursors-PAN and Pitch based; types –HT, HM and intermediate modulus, production, properties and applications. Aramid –Types-Kevlar, Technora HM-50-Production properties and applications. Natural fibers. Surface treatments. Woven, knitted and braided materials – Three dimensional fabrics (woven and braided) – fabric reinforced composites - flexible composites – Applications.

UNIT III MATERIALS 9

Resins **-**Thermosets: Unsaturated polyester, epoxy, vinyl ester, silicone resins– production, properties and applications. Thermoplastics: Examples, Comparison with thermosets. Prepregging techniques. Properties and applications.

UNIT IV PROCESSING OF COMPOSITES 9

Different types of molds**-** DMC, SMC and prepregs. Hand & Spray lay up- RTM, Bag, autoclave, centrifugal and compression molding processes, Filament winding and sandwich construction.

UNIT V TESTING OF COMPOSITES 9

Testing of composites – fiber volume fraction, tensile, shear, compressive, flexural and thermoelastic responses of lamina and laminates - IOSEPESCU shear test - notched strength – fracture toughness-non destructive testing.

PL9003 CONDUCTING POLYMERS L T P C
3 0 0 3

UNIT I ELECTROCHEMISTRY OF CONDUCTING POLYMERS 8

Electrochemistry of electronically conducting polymers-source of electronic conduction in polymers – solitons , polarons and bipolarons – emiconductors and conducting polymers.

UNIT II GENERAL SYNTHESIS OF CONDUCTING POLYMERS 9

Synthesis of conducting polymers – chemical, electrochemical and enzymatic methods – doping –general considerations – measurement of conductivity – van der Pauw technique – factors affecting conductivity.

UNIT III CHARACTERIZATION OF CONDUCTING POLYMERS 8

Characterization of conducting polymers – electroanalytical techniques – cyclic voltammetry, chronoamperometry and chronocoulometry, spectral methods - use of UV-vis, Raman, XRD and NMR.

UNIT IV SYNTHESIS, PROCESSABILITY AND APPLICATIONS 10

Synthesis, processability and applications of acetylene, aniline, pyrrole, thiophene and para – phenylene based conducting polymers.

UNIT V APPLICATIONS OF CONDUCTING POLYMERS 10

Conducting polymers in microelectronics – corrosion and ESD protection, EMI shielding and lithography. LED-rechargeable batteries – artificial muscles - electrochromic devices–sensor devices–conductive composites.

TOTAL:45 PERIODS

PL9004 ENGINEERING PLASTICS L T P C
3 0 0 3

UNIT I POLYMERS FOR ELECTRICAL AND ELECTRONICS APPLICATIONS 10

Engineering plastics – polymers in electrical and electronics industry – electro conducting polymers – polymer batteries – electrets - polymers with piezoelectric, pyroelectric and ferroelectric properties-photo conducting polymers.

UNIT II POLYMERS FOR HIGH TEMPERATURE APPLICATIONS 10

Polymers for high temperature resistance– fluoro polymers – aromatic polymers– heterocyclic polymers – polymers as building materials – ultrahigh fibres – aramids – technora – carbon fibres.

UNIT III POLYMER BLENDS, ALLOYS AND LIQUID CRYSTALS 10

Polymer blends and alloys – reinforced plastics – ionic polymers –interpenetrating networks – sequential – simultaneous – full and semi IPN – thermoplastic IPN – liquid crystalline polymers (LCP) – lyotropic and thermotropic liquid crystals – main chain and side chain liquid crystalline polymers–processing of LCP's- applications –ablative plastics.

UNIT IV POLYMERS IN LITHOGRAPHY AND WATER TREATMENT 10

Polymers in lithography – photoresist – positive resists – negative resists – solution inhibition resists – image reversal process – Ion exchange resins – polymer membrane –polymer complexes for water treatment.

UNIT V POLYMERS FOR BIOMEDICAL APPLICATIONS 5

Polymer for biomedical applications – polymers in dentistry – tissue adhesives – dialysis membrane – blood oxygenators – bone cement – prostheses – biodegradable sutures – control drug delivery systems.

PL9005 PLASTIC WASTE MANAGEMENT L T P C

3 0 0 3

UNIT I POLYMER WASTES 9

Sources of plastic waste – definitions - generation of industrial plastic waste - plastic in solid waste; Separation of components in municipal refuse - separation process specific to plastics.

UNIT II PRIMARY AND SECONDARY RECYCLING 9

Primary recycling – degradation of plastics – industrial practice; Secondary recycling – approaches to secondary recycling – mechanical reworking of plastic waste – chemical modification of mixed plastic waste – coextrusion and coinjection moulding – waste plastics as fillers.

UNIT III TERTIARY AND QUATERNARY RECYCLING 9

Tertiary recycling – chemicals from plastics waste – pyrolysis chemical decomposition of plastic waste; Quaternary recycling energy from plastics waste – incinerator – energy recovery from municipal refuse – effect of plastics on the incineration process – plastics as land refill.

UNIT IV RECYCLING OF PLASTICS 9

Recycling of plastics – surface refurbishing; Plastic aging – environmental aging – thermal aging – weathering – chemical degradation – ionising radiation – wear and erosion; Biodegradation – biodegradable plastics – photodegradable plastics.

UNIT V RECYCLING PROCESSES 9

Specific recycling processes – PET reprocessing – polyolefines – polystyrene – PVC – acrylics; Thermosets – PURS – phenolics – polyesters – epoxy resins – melamine and urea resins – recycling technologies.

PL9006 RUBBER TECHNOLOGY L T P C
3 0 0 3

UNIT I FUNDAMENTALS OF RUBBER 8

Criteria for a polymer to behave as a rubber – structure vs Tg, chemical, mechanical and electrical properties – polymerisation types and techniques involved in production of general purpose rubbers – ozone attack on rubbers– protection against oxidation - antioxidants – network bound antioxidants, vulcanisation – effect of crosslink density on properties – role of accelerators, activators – non–sulphur vulcanisation systems.

UNIT II SPECIALTY RUBBERS 8

Heat resistant rubbers –polyisobutylene, butyl and EPDM rubbers – solvent/oil resistant rubbers –nitrile, neoprene and chloroprene rubbers, EMA,ACM, EVA – hypalon and chlorinated PE – high performance, specialty and modified rubbers – fluorine containing and silicone rubbers, polyurethanes , polyethers, polysulphide, polyalkenomers and thermoplastic elestomers – reclaim, liquid and powdered rubbers, ebonites.

UNIT III PROCESSING OF RUBBER 8

Rubber processing – mixing operations – composition, concentration, stabilisation, coagulation, open mill mixing, internal and continuous mixers – forming operations – calendering – extrusion –spreading and moulding operations.

UNIT IV MANUFACTURE OF TYRES AND TUBES 7

Rubber product manufacture – tyres – functions, requirements – basic design reinforcing systems –construction – manufacture – testing – tube manufacture– compounding for tyre and tube.

UNIT V BELTING, HOSES AND FOOTWEAR 14

Belting and hoses – conveyor, transmission (V and flat) belting. troughing moulded, braided and hand–built hoses – compounding - footwear and ports goods – hot air vulcanized – compression moulded – direct moulded process for shoe bottoming – injection moulded sole and heel units – safety and antistatic foot wear – micro and macrocellular rubbers – expanding rubber by nitrogen gassing and chemical blowing agents– tennicoit rings

PL9007 SYNTHETIC RESINS L T P C
3 0 0 3

UNIT I CLASSIFICATION OF POLYMERS 10

Introduction – Classification of natural, modified and synthetic polymers – effect of structure on properties of polymers –– Salient features of plastics-water soluble polymers– classification- functions and properties – starch- dextrinization – modified starches – cellulose and its derivatives- commercial Applications.

UNIT II WATER SOLUBLE POLYMERS 10

Synthetic water soluble polymers, preparation, properties and applications of polyvinyl alcohol – polyvinyl pyrrolidone – polyacrylic acid and its homologs – polyacrylamide – polyethylene oxide – polyethyleneimine. Application of water soluble polymers in pharmaceuticals – cosmetics – textiles – paper – detergents and soaps – paint – flocculation – beverages – polyelectrolytes.

UNIT III THERMOPLASTIC RESINS 10

Thermoplastic resins – polyolefins – vinyl polymers – poly vinyl chloride-polystyrene – PMMA – SAN – PAN - Teflon – polyamides – polycarbonates and their applications.

UNIT IV THERMOSETTING RESINS 10

Thermosetting resins – phenolic resins – aminoplast – UF- MF - polyesters – alkyd resins – epoxies – bisphenol A and cycloaliphatic based epoxy resins - polyurethanes and polyureas – silicone resins.

UNIT V RUBBERS, FIBERS AND PLASTICS 5

Elastomers – natural rubber – vulcanization - synthetic rubbers - butyl- SBR neoprene. Application of synthetic resins as fiber – commodity plastics – sheets and film – foam – packaging – biodegradable and engineering applications.

TOTAL: 45 PERIODS

PL9008 INDUSTRIAL MANAGEMENT L T P C

3 0 0 3

UNIT I MAN POWER PLANNING 12

Need – objectives – planning for future – manpower planning process- projecting manpower supply and demand at organisational level – developing manpower strategy - recruitment selection and induction – process of recruitment – selection tests – placement induction – orientation – training and development – training – management development – retraining – evaluation of training programmes.

UNIT II MOTIVATION AND PRODUCTIVITY 12

Issues in managing people – Maslow's need hierarchy – social needs and productivity – hygienes and motivators – motivational climate – demotivation – cases – performance appraisal – job performance and performance measurement – validity and reliability – methods – problems in Indian context – career planning – responsibility – process of career planning and development – advantages and limitations.

UNIT III UNION MANAGEMENT PERSPECTIVE 7

Approaches to industrial relations – public policies – major events in international issues – perspectives for India – trade with development and functions – growth of trade unions – development – functions – structure – leadership and management in the trade union.

UNIT IV DYNAMICS OF CONFLICT AND COLLABORATION 7

Process of conflict – types of conflict – interpersonal conflict – managing inter group relations and conflict – industrial conflict resolution – consultation- collective bargaining – types of bargaining – new collective bargaining –negotiation skills – trends in collective bargaining.

UNIT V WORKERS PARTICIPATION AND MANAGEMENT 7

Concept, strategies and practices –models in workers participation management – design and dynamics of articipative forms – case studies– case study analysis – synthesis

PL9009 TOTAL QUALITY MANAGEMENT L T P C

3 0 0 3

UNIT I 9

Introduction to quality control theory - elements of quality, fundamentals of statistics and probability in quality control –measures of central tendency on-normal distribution – significance tests – difference between means. inomial, Poisson distributions – thorndike chart – hypergeometric distribution.

UNIT II 9

Control of process quality – principles of control – quality capability analysis – quality capability study – average range method for determining process capability – control of variable quality – characteristics – theory of control charts –control limits- types of control charts – control chart for variables –X and R control charts – control charts for attributes – P. Chart, C. Charts.

UNIT III 9

Quality assurance and acceptance – acceptance sampling-operating characteristics curve – development of single sampling plan, concept of AQL, LTPD producers and consumers risk – average outgoing quality (AOQ) curve. Other acceptance sampling plans – sampling tables.

UNIT IV 9

Quality engineering – planning for quality and reliability – quality standards – specification of inspection methods, setting of standard quality levels – introduction to ISO-9000 –design of quality experiments using statistics –analysis of variance.

UNIT V 9

Reliability and maintainability – definition of reliability, factors affecting reliability – MTTF – MTBF – evaluation of reliability, quality management – organising for quality – economy of quality- techniques of ABC analysis- quality management education – zero defects concept – quality circles concept- applying total quality management in enterprises.

PL9010 BIOPOLYMERS AND BIODEGRADABLE POLYMERS L T P C
3 0 0 3

UNIT I SYNTHETIC BIODEGRADABLE POLYMERS 11

Biodegradable polymers - poly $\in$-caprolactone- modified poly $\in$- caprolactone copolymer with ester, amide and urethane linkages, polyglycolate, polymandelic acid. Copolymer of 1,4- butanediol with adipic acid and sebacic acid, polyalkylene tartrate cellulose block copolymers -biodegradable polyamides –copolymers of α- amino acid (glycine, serine), $\in$ - aminocaproic acid. Benzyl substituted urethane – polyester urea – polyamide urethane - synthesis and properties. γ -polyglutamic acid, bacterial polyesters. Applications – agriculture, medicine, packaging.

UNIT II PRINCIPLES OF BIODEGRADATION 9

Biodegradation -introduction – modes of biological degradation –enzymatic degradation of biopolymers (poly saccharides, proteins, nucleic acids) and synthetic polymers - microbial degradation of synthetic polymers.

UNIT III DISPOSAL OF MUNICIPAL WASTE 8

Disposal of solid municipal waste by biodegradation – composting (bioreactors) deposition in landfills – microbial decomposition processes in anaerobic rubbish dumps. Ideal bioreactors – stirred tank reactor – Batch and continuous operations – Fed - Batch operation - plug flow reactor.

UNIT IV BIOPOLYMERS 8

Biopolymers - introduction – functions – cotton, wool, paper, rubber, collagen hyaluroran-melanin for UV protection –Applications.

UNIT V STRUCTURE OF BIOPOLYMERS 8

Proteins, nuclic acids and polysaccharides – the macromolecular structure and biological functions of polymers- primary, secondary, tertiary and quarternary structure of polymers – structure maintenance and transmission of the biological information- structure and enzymatic activity – mechano structural function of biopolymers- viruses and phages – living macromolecules.

PL9011 HEAT, MASS AND MOMENTUM TRANSPORT PROCESSES L T P C
3 0 0 3

UNIT I MOMENTUM TRANSPORT PROCESS 10

Momentum transport –fluid behaviour – overall mass, energy and momentum balances – differential mass, energy and momentum balance-polymeric liquids

UNIT II SOLUTION TO EQUATIONS OF MOTION 9

Solution to equations of motion - flow measurement - boundary layer flow – turbulent flow – dimensional analysis applied to momentum transport – design equation for incompressible fluid- flow through packed column–fluidisation.

UNIT III HEAT TRANSFER BY CONDUCTION PROCESS 8

Heat transfer – steady state conduction – unsteady state conduction – numerical and graphical methods in analysis of heat conduction.

UNIT IV CONVECTIVE HEAT TRANSFER PROCESS 8

Convective heat transfer – heat transfer in laminar and turbulent flow- boiling and condensation – design equations for convective heat transfer – heat exchangers.

UNIT V MASS TRANSFER 10

Mass transfer – molecular diffusion – binary systems – convective mass transfer coefficients – mass transfer in laminar and turbulent flow –design equations for convective mass transfer – analysis between momentum, heat and mass transfer.

PL9012 REACTION ENGINEERING L T P C
3 0 0 3

UNIT I REACTION KINETICS AND EVALUATION OF REACTION RATE 12

Reaction kinetics – rate equation – elementary, non-elementary reactions – mechanism – temperature dependence of reaction rates – analysis of experimental reactor data – evaluation of reaction rate – integral and differential analysis for constant and variable volume system

UNIT II RECTORS 12

Ideal reactors – homogeneous reaction systems – batch, stirred tank and tubular flow reactor – design for multiple reactions – choice, yield, conversion, selectivity, reactivity – consecutive, parallel and mixed reactions.

UNIT III HEAT EFFECTS IN REACTORS 12

Heat effects in reactors – isothermal and non-isothermal homogeneous systems adiabatic reactors – rates of heat exchange for different reactors –design for constant rate heat input and constant heat transfer coefficient operation – batch and continuous reactors

UNIT IV REACTOR STABILITY 4

Reactor stability – criteria for stability of reactors, limit cycles and oscillating reactions

UNIT V CHEMICAL EQUILIBRIA AND EQUILIBRIUM CONSTANT 5

Reaction equilibria – equilibrium in chemically reactive system – evaluation of equilibrium constant – effects of temperature on equilibrium – equilibrium composition evaluation.

TOTAL:45 PERIODS

PL9013 PROCESS INSTRUMENTATION L T P C
3 0 0 3

UNIT I TEMPERATURE MEASUREMENT 9

Differential expansion and fluid expansion types - resistance thermometers- thermoelectric pyrometers - radiation pyrometers - optical pyrometers- pyrometric cones- ultrasonic thin wire thermometer- location of temperature
measuring devices in equipments.

UNIT II PRESSURE, LEVEL AND FLOW MEASUREMENT 9

Liquid types and spring balanced type pressure measuring devices- manometer and sealed belt types of pressure measuring equipments- pressure transmitters - various types of level measuring equipments - volumetric, variable head meters for flow measurement- variable area meters - velocity and current meters- ultrasonic flow meters - mass meters.

UNIT III PHYSICAL PROPERTY MEASUREMENT 9

Density and specific gravity - viscosity and consistency - refractive index analysers - boiling point and flash point analysers - thermal conductivity measurement - moisture measurement.

UNIT IV PROCESS CHEMICAL ANALYZER 9

Chromatographic analysers, infrared analysers, ultraviolet and visible radiation analysers, mass spectrometers, electroanalytical instruments.

UNIT V INDICATING AND RECORDING INSTRUMENTS 9

Measurement to indicator transducers, analog and digital indicating and recording instruments, variables of importance to various industries and their measurement

PL9014 COMPUTER AIDED DESIGN L T P C
3 0 0 3

UNIT I COMPUTER GRAPHICS FUNDAMENTALS 10

Graphic primitives – transformations – graphic standards – representation of curves – surface and solid modeling.

UNIT II INTERACTIVE COMPUTER PROGRAMMING 10

Requirements of interactive programming – types of interactive programming- objective oriented programming – development of interactive programmes in languages like Auto LISP etc. – applications.

UNIT III COMPUTER ANIMATION 10

Conventional animation – computer animation – animation requirements – animation types – animation techniques – design application.

UNIT IV MECHANICAL ASSEMBLY 5

Assembly modeling – mating conditions – representation schemes – assembling sequences – assembly analysis.

UNIT V PROTOTYPYING, PROCESS PLANNING AND CAD CAM INTEGRATION 10

Basics of prototypying - principles and planning –basics of process planning and CAD CAM integration.

PL9015 **SYNTHETIC FIBRES** **L T P C**
3 0 0 3

UNIT I INTRODUCTION TO TEXTILE PROCESS 5

Classification of fibres, yarn manufacture, fabric manufacture, wet processing of textile, testing of textile materials.

UNIT II MANUFACTURE OF FIBRE FORMING POLYMERS 15

Polymer production - fibre forming polymers – properties, characterization - production of polyethylene terephthalate (PET), polyester, nylon, polyacrylonitrile and polypropylene.

UNIT III MANUFACTURE OF FILAMENT FIBRE 15

Filament fibre manufacture - melt, wet and dry spinning of polymers- spin finishes – functions, constitution and application - post spinning operations – drawing and winding.

UNIT IV MANUFACTURE OF STAPLE FIBRE 5

Staple fibre manufacture - production of staple fibres – drawing of tow, heat setting, crimping and cutting - tow to top converters – advantages, principles and working of machines.

UNIT V TEXTURIZATION 5

Texturization - introduction, methods, false twist texturing, air jet texturing, comparison.
