1. **Programme Educational Objectives (PEOs)**
Bachelor of Fashion Technology curriculum is designed to prepare the graduates having attitude and knowledge to
   a) Have powerful base to pursue a successful professional and technical career
   b) Have strong foundation in basic sciences, mathematics, engineering and experimentation skills to comprehend the manufacturing processes and provide practical and innovative solutions.
   c) Have knowledge on the theory and practices in the field of fashion technology and allied areas to manage apparel industry and provide techno-economic solutions to the problems.
   d) Engross in life-long learning to keep abreast with emerging technology
   e) Practice and inspire high ethical values and maintain high technical standards

2. **Programme Outcomes (POs)**
   1. Ability to apply knowledge of mathematics, science and engineering in Apparel design and production processes.
   2. Ability to apply knowledge on basics of fiber, yarn, fabric manufacture, chemical processing and testing of textiles in the field of garment production.
   3. Ability to understand and apply basic pattern engineering concepts, garment construction, merchandising and marketing, sewing, woven and knitted fabric design skills in the industry.
   4. Ability to identify and solve technological problems in garment industry
   5. Ability to analyze and apply knowledge in the field of design and production of apparels using computational platforms and software tools.
   6. Commitment to implement the professional and ethical values.
   7. Use the modern tools, techniques and skills necessary for practicing in the apparel design manufacturing industry.
   8. Ability to communicate effectively and work in interdisciplinary groups.
   9. Ability to review, comprehend and report technological development.

3. **Mapping of PEOs with POs**

OBJECTIVES:

- To develop the basic reading and writing skills of first year engineering and technology students.
- To help learners develop their listening skills, which will enable them listen to lectures and comprehend them by asking questions; seeking clarifications.
- To help learners develop their speaking skills and speak fluently in real contexts.
- To help learners develop vocabulary of a general kind by developing their reading skills

UNIT I SHARING INFORMATION RELATED TO ONESELF/FAMILY & FRIENDS 12
Reading - short comprehension passages, practice in skimming-scanning and predicting.
Writing - completing sentences - developing hints.
Listening - short formal and informal conversations.
Speaking - introducing oneself - exchanging personal information.
Language development - Wh- Questions - asking and answering-yes or no questions - parts of speech.
Vocabulary development - prefixes - suffixes - articles - count/uncount nouns.

UNIT II GENERAL READING AND FREE WRITING 12
Reading - comprehension-pre-reading-post reading - comprehension questions (multiple choice questions and/or short questions/ open-ended questions) - inductive reading - short narratives and descriptions from newspapers including dialogues and conversations (also used as short Listening texts).
Writing - paragraph writing - topic sentence - main ideas - free writing, short narrative descriptions using some suggested vocabulary and structures.
Listening - telephonic conversations.
Speaking - sharing information of a personal kind - greeting - taking leave.
Language development - prepositions, conjunctions.
Vocabulary development - guessing meanings of words in context.

UNIT III GRAMMAR AND LANGUAGE DEVELOPMENT 12
Reading - short texts and longer passages (close reading)
Writing - understanding text structure-use of reference words and discourse markers-coherence-jumbled sentences.
Listening - listening to longer texts and filling up the table - product description - narratives from different sources.
Speaking - asking about routine actions and expressing opinions.
Language development - degrees of comparison - pronouns - direct vs indirect questions.
Vocabulary development - single word substitutes - adverbs.

UNIT IV READING AND LANGUAGE DEVELOPMENT 12
Reading - comprehension-reading longer texts - reading different types of texts - magazines
Writing - letter writing, informal or personal letters - e-mails - conventions of personal email
Listening - listening to dialogues or conversations and completing exercises based on them.
Speaking - speaking about oneself - speaking about one's friends.
Language development - Tenses - simple present - simple past - present continuous and past continuous.
Vocabulary development - synonyms - antonyms - phrasal verbs.

UNIT V EXTENDED WRITING 12
Reading - longer texts - close reading
Writing - brainstorming - writing short essays - developing an outline - identifying main and subordinate ideas - dialogue writing.
Listening - listening to talks-conversations.
Speaking - participating in conversations - short group conversations.
OUTCOMES:
At the end of the course, learners will be able to:
- Read articles of a general kind in magazines and newspapers.
- Participate effectively in informal conversations; introduce themselves and their friends and express opinions in English.
- Comprehend conversations and short talks delivered in English.
- Write short essays of a general kind and personal letters and emails in English.

MA8151 ENGINEERING MATHEMATICS – I

OBJECTIVES:
- The goal of this course is to achieve conceptual understanding and to retain the best traditions of traditional calculus. The syllabus is designed to provide the basic tools of calculus mainly for the purpose of modelling the engineering problems mathematically and obtaining solutions. This is a foundation course which mainly deals with topics such as single variable and multivariable calculus and plays an important role in the understanding of science, engineering, economics and computer science, among other disciplines.

UNIT I DIFFERENTIAL CALCULUS
Representation of functions - Limit of a function - Continuity - Derivatives - Differentiation rules - Maxima and Minima of functions of one variable.

UNIT II FUNCTIONS OF SEVERAL VARIABLES
UNIT III INTEGRAL CALCULUS
Definite and Indefinite integrals - Substitution rule - Techniques of Integration - Integration by
parts, Trigonometric integrals, Trigonometric substitutions, Integration of rational functions by
partial fraction, Integration of irrational functions - Improper integrals.

UNIT IV MULTIPLE INTEGRALS
Double integrals – Change of order of integration – Double integrals in polar coordinates – Area
enclosed by plane curves – Triple integrals – Volume of solids – Change of variables in double
and triple integrals.

UNIT V DIFFERENTIAL EQUATIONS
Higher order linear differential equations with constant coefficients - Method of variation of
parameters – Homogenous equation of Euler’s and Legendre’s type – System of simultaneous
linear differential equations with constant coefficients - Method of undetermined coefficients.

TOTAL : 60 PERIODS

OUTCOMES :
After completing this course, students should demonstrate competency in the following skills:
- Use both the limit definition and rules of differentiation to differentiate functions.
- Apply differentiation to solve maxima and minima problems.
- Evaluate integrals both by using Riemann sums and by using the Fundamental Theorem of
  Calculus.
- Apply integration to compute multiple integrals, area, volume, integrals in polar
  coordinates, in addition to change of order and change of variables.
- Evaluate integrals using techniques of integration, such as substitution, partial fractions
  and integration by parts.
- Determine convergence/divergence of improper integrals and evaluate convergent
  improper integrals.
- Apply various techniques in solving differential equations.

TEXT BOOKS :
   2014.
   Delhi, 2015. [For Units I & III - Sections 1.1, 2.2, 2.3, 2.5, 2.7(Tangents problems only), 2.8,
   3.1 to 3.6, 3.11, 4.1, 4.3, 5.1(Area problems only), 5.2, 5.3, 5.4 (excluding net change
   theorem), 5.5, 7.1 - 7.4 and 7.8].

REFERENCES :
OBJECTIVES:
- To enhance the fundamental knowledge in Physics and its applications relevant to various streams of Engineering and Technology.

UNIT I  PROPERTIES OF MATTER  9

UNIT II  WAVES AND FIBER OPTICS  9

UNIT III  THERMAL PHYSICS  9

UNIT IV  QUANTUM PHYSICS  9

UNIT V  CRYSTAL PHYSICS  9
Single crystalline, polycrystalline and amorphous materials – single crystals: unit cell, crystal systems, Bravais lattices, directions and planes in a crystal, Miller indices – inter-planar distances - coordination number and packing factor for SC, BCC, FCC, HCP and diamond structures - crystal imperfections: point defects, line defects – Burger vectors, stacking faults – role of imperfections in plastic deformation - growth of single crystals: solution and melt growth techniques.

TOTAL : 45 PERIODS

OUTCOMES:
Upon completion of this course,
- the students will gain knowledge on the basics of properties of matter and its
applications,
- the students will acquire knowledge on the concepts of waves and optical devices and their applications in fibre optics,
- the students will have adequate knowledge on the concepts of thermal properties of materials and their applications in expansion joints and heat exchangers,
- the students will get knowledge on advanced physics concepts of quantum theory and its applications in tunneling microscopes, and
- the students will understand the basics of crystals, their structures and different crystal growth techniques.

TEXT BOOKS:

REFERENCES:
promoters - acid base catalysis – applications (catalytic convertor) – enzyme catalysis– Michaelis – Menten equation.

UNIT III ALLOYS AND PHASE RULE 9

UNIT IV FUELS AND COMBUSTION 9

UNIT V ENERGY SOURCES AND STORAGE DEVICES 9
Nuclear fission - controlled nuclear fission - nuclear fusion - differences between nuclear fission and fusion - nuclear chain reactions - nuclear energy - light water nuclear power plant - breeder reactor - solar energy conversion - solar cells - wind energy. Batteries, fuel cells and supercapacitors: Types of batteries – primary battery (dry cell) secondary battery (lead acid battery, lithium-ion-battery) fuel cells – \( \text{H}_2-\text{O}_2 \) fuel cell.

TOTAL: 45 PERIODS

OUTCOMES:
- The knowledge gained on engineering materials, fuels, energy sources and water treatment techniques will facilitate better understanding of engineering processes and applications for further learning.

TEXT BOOKS:

REFERENCES:

GE8151 PROBLEM SOLVING AND PYTHON PROGRAMMING L T P C
3 0 0 3

OBJECTIVES:
- To know the basics of algorithmic problem solving
- To read and write simple Python programs.
- To develop Python programs with conditionals and loops.
To define Python functions and call them.
To use Python data structures — lists, tuples, dictionaries.
To do input/output with files in Python.

UNIT I  ALGORITHMIC PROBLEM SOLVING

Algorithms, building blocks of algorithms (statements, state, control flow, functions), notation (pseudo code, flow chart, programming language), algorithmic problem solving, simple strategies for developing algorithms (iteration, recursion). Illustrative problems: find minimum in a list, insert a card in a list of sorted cards, guess an integer number in a range, Towers of Hanoi.

UNIT II  DATA, EXPRESSIONS, STATEMENTS

Python interpreter and interactive mode; values and types: int, float, boolean, string, and list; variables, expressions, statements, tuple assignment, precedence of operators, comments; modules and functions, function definition and use, flow of execution, parameters and arguments; Illustrative programs: exchange the values of two variables, circulate the values of n variables, distance between two points.

UNIT III  CONTROL FLOW, FUNCTIONS

Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: state, while, for, break, continue, pass; Fruitful functions: return values, parameters, local and global scope, function composition, recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as arrays. Illustrative programs: square root, gcd, exponentiation, sum an array of numbers, linear search, binary search.

UNIT IV LISTS, TUPLES, DICTIONARIES

Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Dictionaries: operations and methods; advanced list processing - list comprehension; Illustrative programs: selection sort, insertion sort, mergesort, histogram.

UNIT V FILES, MODULES, PACKAGES

Files and exception: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages; Illustrative programs: word count, copy file.

OUTCOMES:
Upon completion of the course, students will be able to
- Develop algorithmic solutions to simple computational problems
- Read, write, execute by hand simple Python programs.
- Structure simple Python programs for solving problems.
- Decompose a Python program into functions.
- Represent compound data using Python lists, tuples, dictionaries.
- Read and write data from/to files in Python Programs.

TOTAL : 45 PERIODS

TEXT BOOKS:

REFERENCES:

GE8152   ENGINEERING GRAPHICS   L T P C
                             2 0 4 4

OBJECTIVES:
• To develop in students, graphic skills for communication of concepts, ideas and design of Engineering products.
• To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination) 1
Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.

UNIT I  PLANE CURVES AND FREEHAND SKETCHING 7+12
Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of ellipse, parabola and hyperbola by eccentricity method – Construction of cycloid – construction of involutes of square and circle – Drawing of tangents and normal to the above curves. Visualization concepts and Free Hand sketching: Visualization principles –Representation of Three Dimensional objects – Layout of views- Freehand sketching of multiple views from pictorial views of objects

UNIT II  PROJECTION OF POINTS, LINES AND PLANE SURFACE 6+12
Orthographic projection- principles-Principal planes-First angle projection-projection of points. Projection of straight lines (only First angle projections) inclined to both the principal planes - Determination of true lengths and true inclinations by rotating line method and traces Projection of planes (polygonal and circular surfaces) inclined to both the principal planes by rotating object method.

UNIT III  PROJECTION OF SOLIDS 5+12
Projection of simple solids like prisms, pyramids, cylinder, cone and truncated solids when the axis is inclined to one of the principal planes by rotating object method.

UNIT IV  PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES 5+12
Sectioning of above solids in simple vertical position when the cutting plane is inclined to the one of the principal planes and perpendicular to the other – obtaining true shape of section. Development of lateral surfaces of simple and sectioned solids – Prisms, pyramids cylinders and cones.
UNIT V  ISOMETRIC AND PERSPECTIVE PROJECTIONS  

Principles of isometric projection – isometric scale –Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders, cones- combination of two solid objects in simple vertical positions - Perspective projection of simple solids-Prisms, pyramids and cylinders by visual ray method.

OUTCOMES:
On successful completion of this course, the student will be able to
- familiarize with the fundamentals and standards of Engineering graphics
- perform freehand sketching of basic geometrical constructions and multiple views of objects.
- project orthographic projections of lines and plane surfaces.
- draw projections and solids and development of surfaces.
- visualize and to project isometric and perspective sections of simple solids.

TEXT BOOK:

REFERENCES:

Publication of Bureau of Indian Standards:

Special points applicable to University Examinations on Engineering Graphics:
1. There will be five questions, each of either or type covering all units of the syllabus.
2. All questions will carry equal marks of 20 each making a total of 100.
3. The answer paper shall consist of drawing sheets of A3 size only. The students will be permitted to use appropriate scale to fit solution within A3 size. The examination will be conducted in appropriate sessions on the same day.
OBJECTIVES:
- To write, test, and debug simple Python programs.
- To implement Python programs with conditionals and loops.
- Use functions for structuring Python programs.
- Represent compound data using Python lists, tuples, dictionaries.
- Read and write data from/to files in Python.

LIST OF PROGRAMS
1. Compute the GCD of two numbers.
2. Find the square root of a number (Newton's method)
3. Exponentiation (power of a number)
4. Find the maximum of a list of numbers
5. Linear search and Binary search
6. Selection sort, Insertion sort
7. Merge sort
8. First n prime numbers
9. Multiply matrices
10. Programs that take command line arguments (word count)
11. Find the most frequent words in a text read from a file
12. Simulate elliptical orbits in Pygame
13. Simulate bouncing ball using Pygame

PLATFORM NEEDED
Python 3 interpreter for Windows/Linux

OUTCOMES:
Upon completion of the course, students will be able to
- Write, test, and debug simple Python programs.
- Implement Python programs with conditionals and loops.
- Develop Python programs step-wise by defining functions and calling them.
- Use Python lists, tuples, dictionaries for representing compound data.
- Read and write data from/to files in Python.

TOTAL :60 PERIODS

BS8161 PHYSICS AND CHEMISTRY LABORATORY (Common to all branches of B.E. / B.Tech Programmes)

OBJECTIVES:
- To introduce different experiments to test basic understanding of physics concepts applied in optics, thermal physics, properties of matter and liquids.

LIST OF EXPERIMENTS: PHYSICS LABORATORY (Any 5 Experiments)
1. Determination of rigidity modulus – Torsion pendulum
2. Determination of Young's modulus by non-uniform bending method
3. (a) Determination of wavelength, and particle size using Laser
    (b) Determination of acceptance angle in an optical fiber.
5. Determination of velocity of sound and compressibility of liquid – Ultrasonic interferometer
6. Determination of wavelength of mercury spectrum – spectrometer grating
7. Determination of band gap of a semiconductor
8. Determination of thickness of a thin wire – Air wedge method

TOTAL: 30 PERIODS

OUTCOMES:
Upon completion of the course, the students will be able to
• apply principles of elasticity, optics and thermal properties for engineering applications.

CHEMISTRY LABORATORY: (Any seven experiments to be conducted)

OBJECTIVES:
• To make the student to acquire practical skills in the determination of water quality parameters through volumetric and instrumental analysis.
• To acquaint the students with the determination of molecular weight of a polymer by viscometry.

1. Estimation of HCl using Na₂CO₃ as primary standard and Determination of alkalinity in water sample.
2. Determination of total, temporary & permanent hardness of water by EDTA method.
3. Determination of DO content of water sample by Winkler’s method.
4. Determination of chloride content of water sample by argentometric method.
5. Estimation of copper content of the given solution by Iodometry.
6. Determination of strength of given hydrochloric acid using pH meter.
7. Determination of strength of acids in a mixture of acids using conductivity meter.
8. Estimation of iron content of the given solution using potentiometer.
9. Estimation of iron content of the water sample using spectrophotometer (1, 10-Phenanthroline / thiocyanate method).
10. Estimation of sodium and potassium present in water using flame photometer.
12. Pseudo first order kinetics-ester hydrolysis.
14. Determination of CMC.
15. Phase change in a solid.
16. Conductometric titration of strong acid vs strong base.

OUTCOMES:
• The students will be outfitted with hands-on knowledge in the quantitative chemical analysis of water quality related parameters.

TOTAL: 30 PERIODS

TEXTBOOKS:
OBJECTIVES:
The Course prepares second semester engineering and technology students to:

• Develop strategies and skills to enhance their ability to read and comprehend engineering and technology texts.
• Foster their ability to write convincing job applications and effective reports.
• Develop their speaking skills to make technical presentations, participate in group discussions.
• Strengthen their listening skill which will help them comprehend lectures and talks in their areas of specialisation.

UNIT I INTRODUCTION TECHNICAL ENGLISH
Listening- Listening to talks mostly of a scientific/technical nature and completing information-gap exercises- Speaking –Asking for and giving directions- Reading – reading short technical texts from journals- Newspapers- Writing- purpose statements – extended definitions – issue- writing instructions – checklists-recommendations

Vocabulary Development – technical vocabulary

Language Development –subject verb agreement - compound words.

UNIT II READING AND STUDY SKILLS
Listening- Listening to longer technical talks and completing exercises based on them-Speaking – describing a process-Reading – reading longer technical texts- identifying the various transitions in a text- paragraphing- Writing- interpreting graphs, graphs-

Vocabulary Development-vocabulary used in formal letters/emails and reports Language Development- impersonal passive voice, numerical adjectives.

UNIT III TECHNICAL WRITING AND GRAMMAR
Listening- Listening to classroom lectures/ talks on engineering/technology -Speaking – introduction to technical presentations-Reading – longer texts both general and technical, practice in speed reading; Writing-Describing a process, use of sequence words-

Vocabulary Development- sequence words- Misspelled words. Language Development- embedded sentences

UNIT IV REPORT WRITING
Listening- Listening to documentaries and making notes. Speaking – mechanics of presentations- Reading – reading for detailed comprehension- Writing- email etiquette- job application – cover letter –Résumé preparation( via email and hard copy)- analytical essays and issue based essays– Vocabulary Development- finding suitable synonyms-paraphrasing-

Language Development- clauses- if conditionals.

UNIT V GROUP DISCUSSION AND JOB APPLICATIONS
Listening- TED/Ink talks; Speaking –participating in a group discussion -Reading– reading and understanding technical articles Writing– Writing reports- minutes of a meeting- accident and survey-Vocabulary Development- verbal analogies Language Development- reported speech

OUTCOMES: At the end of the course learners will be able to:

• Read technical texts and write area- specific texts effortlessly.
• Listen and comprehend lectures and talks in their area of specialisation successfully.
• Speak appropriately and effectively in varied formal and informal contexts.
• Write reports and winning job applications.

TOTAL :60 PERIODS
TEXT BOOKS:

REFERENCES
2. Grussendorf, Marion, English for Presentations, Oxford University Press, Oxford: 2007

Students can be asked to read Tagore, Chetan Bhagat and for supplementary reading.

MA8251 ENGINEERING MATHEMATICS – II

OBJECTIVES:
- This course is designed to cover topics such as Matrix Algebra, Vector Calculus, Complex Analysis and Laplace Transform. Matrix Algebra is one of the powerful tools to handle practical problems arising in the field of engineering. Vector calculus can be widely used for modelling the various laws of physics. The various methods of complex analysis and Laplace transforms can be used for efficiently solving the problems that occur in various branches of engineering disciplines.

UNIT I MATRICES 12

UNIT II VECTOR CALCULUS 12
Gradient and directional derivative – Divergence and curl - Vector identities – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral - Area of a curved surface - Volume integral - Green's, Gauss divergence and Stoke's theorems – Verification and application in evaluating line, surface and volume integrals.

UNIT III ANALYTIC FUNCTIONS 12
Analytic functions – Necessary and sufficient conditions for analyticity in Cartesian and polar coordinates - Properties – Harmonic conjugates – Construction of analytic function - Conformal mapping – Mapping by functions \( w = z + c, \frac{1}{z}, z^2 \) - Bilinear transformation.

UNIT IV COMPLEX INTEGRATION 12
UNIT V LAPLACE TRANSFORMS

TOTAL: 60 PERIODS

OUTCOMES:
After successfully completing the course, the student will have a good understanding of the following topics and their applications:

- Eigenvalues and eigenvectors, diagonalization of a matrix, Symmetric matrices, Positive definite matrices and similar matrices.
- Gradient, divergence and curl of a vector point function and related identities.
- Evaluation of line, surface and volume integrals using Gauss, Stokes and Green’s theorems and their verification.
- Analytic functions, conformal mapping and complex integration.
- Laplace transform and inverse transform of simple functions, properties, various related theorems and application to differential equations with constant coefficients.

TEXT BOOKS:

REFERENCES:
Free radical, substitutions, electrophilic, addition, aromatic electrophilic substitutions, nucleophilic additions, condensation reactions, nucleophilic substitutions in aliphatic and aromatic compounds, cyclo-additions, rearrangements-Beckmann and Fries rearrangement reactions.

UNIT III OILS, FATS, SOAPS & LUBRICANTS
Chemical constitution, Chemical analysis of oils and fats – acid, saponification and iodine values, Definitions, determinations and significance. Definition, mechanism of lubrication, preparation of petrolubes, desirable characteristics – viscosity, viscosity index, carbon residue, oxidation stability, flash and fire points, cloud and pour points, aniline point. Semisolid lubricant – greases, preparation of sodium, lithium, calcium and axle greases and uses, consistency test and drop point test. Solid lubricants – graphite and molybdemenium disulphide.

UNIT IV CHEMICALS AND AUXILIARIES
Preparation, properties and uses of bleaching powder, sodium hypochlorite, hydrogen peroxide, chlorine dioxide. Estimation of available chlorine in hypochlorite bleach liquor. Determination of strength of hydrogen peroxide.

UNIT V COLORANTS
Theory of color and constitution: chromophore and auxochrome, classification of dyes based on application. Chemistry and synthesis of azo dye (Methyl red, Methyl orange and Congo red)

TOTAL: 45 PERIODS

TEXTBOOKS:

REFERENCES:
UNIT I  ELECTRICAL CIRCUITS & MEASUREMENTS  9

UNIT II  ELECTRICAL MACHINES  9

UNIT III  SEMICONDUCTOR DEVICES AND APPLICATIONS  9

UNIT IV  DIGITAL ELECTRONICS  9

UNIT V  FUNDAMENTALS OF COMMUNICATION ENGINEERING  9

TOTAL: 45 PERIODS

OUTCOMES:
- ability to identify the electrical components and explain the characteristics of electrical machines.
- ability to identify electronics components and understand the characteristics

TEXT BOOKS:

REFERENCES:
OBJECTIVES

- To enable the students to learn about the basics of fibre forming, yarn production, fabric formation, coloration of fabrics and garment manufacturing

UNIT I BASICS OF FIBRE SCIENCE AND SPINNING 13
Definition of fibre, classification of textile fibers; polymer and polymerization; fibre production principles – wet spinning, dry spinning, melt spinning, gel spinning, dope spinning; characteristics of cotton, viscose, wool, silk, polyester, nylon, polypropylene; sequence of machineries in short staple yarn spinning from ginning to cone winding and their objectives.

UNIT II BASICS OF FABRIC PRODUCTION 13
Woven fabric – warp, weft, weaving, path of warp; looms – classification, handloom and its parts, powerloom, automatic looms, shuttleless looms, special type of looms; preparatory machines for weaving process and their objectives; basic weaving mechanism - primary, secondary and auxiliary mechanisms; knitting – classification, principle, types of fabrics; nonwoven process – classification, principle, types of fabrics.

UNIT III BASICS OF CHEMICAL PROCESSING 9
Objectives of the processes - singeing, desizing, scouring, bleaching, mercerization; dyeing-classification of dyes, types of dyeing techniques; printing –types and styles of printing; finishing treatments – chemical and mechanical finishing.

UNIT IV BASICS OF GARMENT MANUFACTURING 5
Anthropometry, basic principles of pattern making and grading, marker planning, spreading, cutting, sorting, sewing, finishing and packing.

UNIT V BASIC FIBRE, YARN AND FABRIC PROPERTIES 5
Essential fibre properties- cotton and polyester; yarn numbering systems; essential yarn properties; fabric specifications and essential fabric properties

TOTAL – 45 PERIODS

OUTCOMES:

- The students will have the knowledge on the basics of fibre forming polymers, weaving the yarns into fabric, coloration of the fabrics and manufacturing of garments.

TEXT BOOKS

REFERENCE BOOKS

FT8201 CONCEPTS OF FASHION AND DESIGN L T P C 2 0 0 2

OBJECTIVES:
• To introduce briefly the basic concepts of fashion and design to the students

UNIT I 6
Design types- natural, stylized, geometric, historic and abstract; garment design- structural, decorative and functional.

UNIT II 6
Elements of Design – line, shape, form, size, colour, texture and pattern; principles of design – Harmony, Balance, Rhythm, Emphasis and Proportion; introducing elements and principles of design in apparels.

UNIT III 6
Colour – definition; dimensions of colour-hue, value and intensity; colour categories and psychology - warm and cool colours; advancing and receding colours; colour theories – Prang colour system and Munsell colour system; colour harmonies.

UNIT IV 12
Fashion – definition, tangibles and intangibles of fashion; fashion life cycle; fashion adoption theories; fashion terminology -street fashion, recurring fashion, mass fashion, fashion trend, fashion shows, style, chic, boutique, Haute Couture; role of a fashion designer.

TOTAL: 30 PERIODS

OUTCOME
• Upon the completion of this course, the students shall understand the basic concepts of fashion and design, colour basics, dimensions, categories and their characteristics.

TEXT BOOKS:

REFERENCES:
OBJECTIVES:
To provide exposure to the students with hands on experience on various basic engineering practices in Civil, Mechanical, Electrical and Electronics Engineering.

GROUP A (CIVIL & MECHANICAL)

I  CIVIL ENGINEERING PRACTICE  13
Buildings:
(a) Study of plumbing and carpentry components of residential and industrial buildings.
   Safety aspects.

Plumbing Works:
(a) Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings.
(b) Study of pipe connections requirements for pumps and turbines.
(c) Preparation of plumbing line sketches for water supply and sewage works.
(d) Hands-on-exercise:
   Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.
(e) Demonstration of plumbing requirements of high-rise buildings.

Carpentry using Power Tools only:
(a) Study of the joints in roofs, doors, windows and furniture.
(b) Hands-on-exercise:
   Wood work, joints by sawing, planing and cutting.

II  MECHANICAL ENGINEERING PRACTICE  18
Welding:
(a) Preparation of butt joints, lap joints and T- joints by Shielded metal arc welding.
(b) Gas welding practice

Basic Machining:
(a) Simple Turning and Taper turning
(b) Drilling Practice

Sheet Metal Work:
(a) Forming & Bending:
(b) Model making – Trays and funnels.
(c) Different type of joints.

Machine assembly practice:
(a) Study of centrifugal pump
(b) Study of air conditioner

Demonstration on:
(a) Smithy operations, upsetting, swaging, setting down and bending. Example –
   Exercise – Production of hexagonal headed bolt.
(b) Foundry operations like mould preparation for gear and step cone pulley.
(c) Fitting – Exercises – Preparation of square fitting and V – fitting models.

GROUP B (ELECTRICAL & ELECTRONICS)

III ELECTRICAL ENGINEERING PRACTICE
1. Residential house wiring using switches, fuse, indicator, lamp and energy meter.
2. Fluorescent lamp wiring.
3. Stair case wiring
5. Measurement of energy using single phase energy meter.

IV ELECTRONICS ENGINEERING PRACTICE
1. Study of Electronic components and equipments – Resistor, colour coding
   measurement of AC signal parameter (peak-peak, rms period, frequency) using CR.
2. Study of logic gates AND, OR, EX-OR and NOT.
4. Soldering practice – Components Devices and Circuits – Using general purpose PCB.
5. Measurement of ripple factor of HWR and FWR.

TOTAL: 60 Periods

OUTCOMES:
On successful completion of this course, the student will be able to
- fabricate carpentry components and pipe connections including plumbing works.
- use welding equipments to join the structures.
- Carry out the basic machining operations
- Make the models using sheet metal works
- Illustrate on centrifugal pump, Air conditioner, operations of smithy, foundary and fittings
- Carry out basic home electrical works and appliances
- Measure the electrical quantities
- Elaborate on the components, gates, soldering practices.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

CIVIL
1. Assorted components for plumbing consisting of metallic pipes, plastic pipes, flexible pipes, couplings, unions, elbows, plugs and other fittings. 15 Sets.
2. Carpentry vice (fitted to work bench) 15 Nos.
4. Models of industrial trusses, door joints, furniture joints 5 each
5. Power Tools: (a) Rotary Hammer 2 Nos
   (b) Demolition Hammer 2 Nos
   (c) Circular Saw 2 Nos
   (d) Planer 2 Nos
   (e) Hand Drilling Machine 2 Nos
   (f) Jigsaw 2 Nos

MECHANICAL
1. Arc welding transformer with cables and holders 5 Nos.
2. Welding booth with exhaust facility 5 Nos.
3. Welding accessories like welding shield, chipping hammer, wire brush, etc. 5 Sets.
4. Oxygen and acetylene gas cylinders, blow pipe and other welding outfit. 2 Nos.
5. Centre lathe 2 Nos.
6. Hearth furnace, anvil and smithy tools 2 Sets.
7. Moulding table, foundry tools 2 Sets.
9. Study-purpose items: centrifugal pump, air-conditioner One each.

**ELECTRICAL**

1. Assorted electrical components for house wiring 15 Sets
2. Electrical measuring instruments 10 Sets
3. Study purpose items: Iron box, fan and regulator, emergency lamp 1 each
4. Megger (250V/500V) 1 No.
5. Power Tools: (a) Range Finder 2 Nos
   (b) Digital Live-wire detector 2 Nos

**ELECTRONICS**

1. Soldering guns 10 Nos.
2. Assorted electronic components for making circuits 50 Nos.
3. Small PCBs 10 Nos.
5. Study purpose items: Telephone, FM radio, low-voltage power supply

**OBJECTIVE**

- To make the student acquire practical skills in the wet chemical and instrumental methods for quantitative estimation of nitrite in water, cement, oil, coal, Phenol

**LIST OF EXPERIMENTS (Any ten experiments)**

1. Determination of Redwood / Saybolt numbers, kinematic viscosity and viscosity index of lubricating oils
2. Determination of flash point, fire point, cloud and pour point of oils
3. Determination of acid value, iodine value of oils and saponification value.
4. Determination of COD of water samples
5. Determination of total, temporary & permanent hardness of water by EDTA method.
6. Estimation of HCl using Na₂CO₃ as primary standard and determination of alkalinity in water sample.
7. Determination of purity of washing soda and strength of a commercial acid
8. Estimation of available chlorine in hypochlorite solution
9. Estimation of strength of hydrogen peroxide
11. Determination of Calorific value using Bomb calorimeter

**TOTAL: 60 PERIODS**
• Familiarization with equipment like viscometers, flash and fire point apparatus etc
• Familiarization of methods for determining COD
• Familiarization of a few simple synthetic techniques for soap

TEXT BOOKS

MA8391   PROBABILITY AND STATISTICS   L T P C
4   0  0  4

OBJECTIVE:
• This course aims at providing the required skill to apply the statistical tools in engineering problems.
• To introduce the basic concepts of probability and random variables.
• To introduce the basic concepts of two dimensional random variables.
• To acquaint the knowledge of testing of hypothesis for small and large samples which plays an important role in real life problems.
• To introduce the basic concepts of classifications of design of experiments which plays very important roles in the field of agriculture and statistical quality control.

UNIT I    PROBABILITY AND RANDOM VARIABLES        12

UNIT II    TWO - DIMENSIONAL RANDOM VARIABLES        12
Joint distributions – Marginal and conditional distributions – Covariance – Correlation and linear regression – Transformation of random variables – Central limit theorem (for independent and identically distributed random variables).

UNIT III   TESTING OF HYPOTHESIS                   12
Sampling distributions - Estimation of parameters - Statistical hypothesis - Large sample tests based on Normal distribution for single mean and difference of means -Tests based on t, Chi-square and F distributions for mean, variance and proportion - Contingency table (test for independent) - Goodness of fit.

UNIT IV    DESIGN OF EXPERIMENTS                   12
One way and Two way classifications - Completely randomized design – Randomized block design – Latin square design - $2^2$ factorial design.

UNIT V    STATISTICAL QUALITY CONTROL            12
Control charts for measurements (X and R charts) – Control charts for attributes (p, c and np charts) – Tolerance limits - Acceptance sampling.

TOTAL: 60 PERIODS

OUTCOMES:
Upon successful completion of the course, students will be able to:
• Understand the fundamental knowledge of the concepts of probability and have knowledge of standard distributions which can describe real life phenomenon.
• Understand the basic concepts of one and two dimensional random variables and apply in engineering applications.
• Apply the concept of testing of hypothesis for small and large samples in real life problems.
• Apply the basic concepts of classifications of design of experiments in the field of agriculture and statistical quality control.
• Have the notion of sampling distributions and statistical techniques used in engineering and management problems.

TEXT BOOKS:

REFERENCES:

FT8301 TECHNOLOGY OF SPINNING PROCESSES L T P C
3 0 0 3

OBJECTIVE:
• To enable the students to understand various processes involved in conversion of fibre to yarn by ring spinning system and other modern spinning systems.

UNIT I OPENING AND CLEANING 9
Linear density systems for textile materials; Ginning – objectives, types, working principle and ginning performance on yarn quality; opening and cleaning – objectives of blow room machines, principle of opening, cleaning and blending machines, contamination clearers and safety devices; chute feed system

UNIT II CARDING AND DRAWING 9
Carding – objectives, principles of carding, working of carding machine; drawing machine – objectives, drafting system – types and applications, principles of auto levellers

UNIT III COMBING AND ROVING 9
Comber preparation – objectives, principles of sliver lap ribbon lap and super lap formers; comber - principle of combing, sequence of combing operation; roving machine – objectives, working principle and operation

UNIT IV RING SPINNING AND YARN PLYING 9
Ring spinning machine – objectives, working principle and operation; condensed yarn spinning – principles, merits; two-folding of yarns –package preparation, working principle, resultant count calculation; fancy yarn – types, method of production and applications
UNIT V NEW SPINNING PROCESS

Principles of yarn formation and material flow – rotor, friction, air-jet and air vortex spinning machines; core, wrap spinning system, comparison of yarn properties

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course, the student shall understand
- Process sequence for producing different types of yarns
- Principle of machines used for production of yarn

TEXT BOOKS:

REFERENCES:

TT8351 CHARACTERISTICS OF TEXTILE FIBRES

OBJECTIVES:
To enable the students to understand the
- Structure and morphology of textile fibres
- Physical characteristics textile fibres

UNIT I STRUCTURE AND MORPHOLOGY 18
Classification of fibres; study of morphological structures of fibers; physical properties of fibres. 
order and disorder in fibre structure; molecular conformations – planar zig-zag, helical, lamellar, 
and sphrulite conformations; Transmission and Scanning electron microscopes-principle; 
construction and working; X-ray diffraction techniques – estimation of crystallinity; Infrared 
radiation and dichroism techniques; chemical element and group identification by transmittance 
and optical density methods, molecular orientation estimation

UNIT II MOISTURE ABSORPTION CHARACTERISTICS 12
Theories of moisture sorption; Moisture absorption behavior of natural and man-made fibres; 
influence of fibre structure, humidity and temperature on the moisture absorption; conditioning of 
Heat of sorption – integral and differential, their relation; factors influencing heat of sorption - 
measurement of heat of sorption

UNIT III TENSILE CHARACTERISTICS 18
Tensile characteristics – study of strength, elongation, work of rupture, initial modulus, work factor 
and yield point – determination of yield point. Stress-strain relations of natural and manmade fibres 
- influence of fibre structure, humidity and temperature on tensile characteristics. Time effects 
Study of creep phenomena. Elastic recovery and its relation to stress and strain of fibres; 
mechanical conditioning of fibres and its influence on elastic recovery. Load cycling and extension 
cycling-their effect on elastic recovery. Introduction about torsional and flexural rigidity of fibers

UNIT IV OPTICAL AND FRICTIONAL CHARACTERISTICS 6
Reflexion and Lustre-objective and subjective methods of measurement - refractive index and its 
measurement - birefringence, factors influencing birefringence - Absorption and dichroism Friction 
– static, limiting and kinetic friction, its measurement, comparison of fibres, directional friction in 
wool – friction.

UNIT V THERMAL CHARACTERISTICS 6
Thermal transitions of fibres - thermal conductivity, thermal expansion and contraction, Tg, 
melting; static electricity in textile fibres

TOTAL:60 PERIODS

OUTCOMES:
Upon completion of this course, the student shall be able to

- Correlate the physical properties of fibre to its microstructure and its influence on other 
characteristics
- Choose appropriate fibre for the required property

TEXT BOOKS:
1870812379

REFERENCES:
OBJECTIVE:

- To introduce students to human anthropometrics from the scientific and technological viewpoint
- To equip students with comprehensive pattern making skills

UNIT I  BASICS OF ANTHROPOMETRICS AND SIZING SYSTEMS  12

UNIT II  STUDY OF BODY MEASUREMENTS  6
Important body measurements across all age groups, Methods of measuring body dimensions, Standard measurement chart-designation and control dimensions.

UNIT III  BASICS OF PATTERN MAKING  9
Functions of pattern making tools, Preparing and Measuring the Form, Trueing, blending, pattern grain line, balance line terms, notches, seam allowance, jog seam, dart points, pleats, flares, gather and true bias.

UNIT IV  BASIC PATTERN SET  9
Pattern making - Drafting and draping methods. Basic men’s and women’s block.

UNIT V  PRINCIPLES OF PATTERN MAKING  9

TOTAL: 45 PERIODS

OUTCOME:

- The course would help the students to develop better understanding on how clothing should be designed, so as to provide not only good fit but also enhance body image

TEXT BOOKS:

REFERENCES:

FT8303 FUNDAMENTALS OF GARMENT MANUFACTURING L T P C
2 0 0 2

OBJECTIVE:
• To introduce briefly the fundamentals of garment manufacture to the students

UNIT I
Introduction to Indian apparel industry; Anthropometry- definition and tools, Specification sheet, technical pack; Structure of an apparel industry-work flow, Pre production planning; types of samples and sample approval;

UNIT II
Objectives and requirements of spreading, marker planning, marker efficiency, cutting.

UNIT III
Stitch types and uses; seam types and uses; stitch and seam identification; characteristics of sewing threads; elements and functions of SNLS machine and working aids

UNIT IV
Garment accessories, trims and components; fusing requirements and process; Objectives of pressing and packing

TOTAL: 30 PERIODS

OUTCOME:
• Upon completion of this course, the students shall understand fundamental aspects of production of garment and various processes involved

TEXT BOOKS:

REFERENCES:
OBJECTIVE:

- To acquaint the student with the history of fashion, its elements, traditional costumes, accessories and embellishments.

UNIT I

UNIT II
Indian garments from ancient to modern times. Traditional Indian textiles – Motifs, colour combinations, designs. Accessories and embellishments.

UNIT III

UNIT IV
African and European traditional costumes, colour combination, designs, motifs and accessories.

UNIT V
Traditional costumes of Asian countries, colour combination, designs, motifs and accessories.

TOTAL: 45 PERIODS

OUTCOME:

- Upon completion of the course, the student would develop an understanding of fashion evolution and fashion designing

TEXT BOOKS:

EE8362  BASIC ELECTRICAL AND ELECTRONICS ENGINEERING LABORATORY     L T P C
                                                                                      0 0 4 2

OBJECTIVES:
- To determine characteristics of electrical apparatus and electronic devices by conducting suitable experiments.

LIST OF EXPERIMENTS
1. Verification of Ohm’s law and Kirchhoff’s laws.
2. Measurement of three phase power
3. Load test on DC shunt motor.
4. Load test on single-phase Transformer
5. Load test on separately excited DC generator
6. Study of half wave and full wave rectifiers.
7. RC coupled transistor amplifier.
8. Study of logic gates and implementation of Boolean functions.
10. Study of modulation and demodulation principles
11. Study of communication systems
12. Study of ADC and DAC circuits

Minimum of 10 Experiments to be carried out :-

OUTCOMES:
- Understanding the relation between electrical voltage, current and resistance.
- Ability to measure the performance of electrical machine like DC and AC motors.
- Visualizing the usage of logic gates and Microprocessor in motor control systems.

FT8311  FASHION ILLUSTRATION LABORATORY     L T P C
                                                                                      0 0 4 2

OBJECTIVE:
- To train the students in fashion illustration

LIST OF EXPERIMENTS
1. Drawing different objects.
2. Sketching of Ideal figure.
4. Creating garment designs.
5. Proportions and style line illustrations.
All the experiments are in variants.  

TOTAL: 60 PERIODS

OUTCOME:
- Upon completion of this practical course, the student would be able to sketch human body, ideal figures and create garment designs.

LIST OF EQUIPMENT REQUIRED FOR 30 STUDENTS
- Drawing tables - 15 Nos.

FT8312 PATTERN ENGINEERING LABORATORY I L T P C 0 0 4 2

OBJECTIVE:
- To train the students in pattern making of apparels.

LIST OF EXPERIMENTS
1. Measuring the Form – Male, female and child.
2. Formulating standard measurement chart.
3. Drafting the basic pattern set using the above measurement chart.
4. Single dart series slash spread technique
5. Single dart series pivotal transfer technique
6. Double dart series slash spread technique
7. Double dart series pivotal transfer technique.

TOTAL: 60 PERIODS

OUTCOME:
- Upon completion of this practical course, the student would have practical experience on pattern making of garments

LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS
- Working surface – pattern making / cutting table (polished or laminated top) – 5 Nos.
- Rulers – 12” and 36” – 15 Nos.
- Tailor’s square – 24” x 14” – 15 Nos.
- Curve rules – French curves, hip curves and vary form curve – 15 Nos.
- Pattern notcher, tracing wheel, awl – 5 Nos.
- Measuring tape – 30 Nos.
- Pattern weights – 10 Nos.
- Dress forms (Full and Half) – Men, Women and children – 1 set each

HS8381 INTERPERSONAL SKILLS/LISTENING AND SPEAKING L T P C 0 0 2 1

OBJECTIVES: The Course will enable learners to:
- Equip students with the English language skills required for the successful undertaking of academic studies with primary emphasis on academic speaking and listening skills.
- Provide guidance and practice in basic general and classroom conversation and to engage in specific academic speaking activities.
- Improve general and academic listening skills
- Make effective presentations.

UNIT I
Listening as a key skill- its importance- speaking - give personal information - ask for personal information - express ability - enquire about ability - ask for clarification Improving pronunciation - pronunciation basics taking lecture notes - preparing to listen to a lecture - articulate a complete idea as opposed to producing fragmented utterances.

UNIT II
Listen to a process information- give information, as part of a simple explanation - conversation starters: small talk - stressing syllables and speaking clearly - intonation patterns - compare and contrast information and ideas from multiple sources- converse with reasonable accuracy over a wide range of everyday topics.

UNIT III
Lexical chunking for accuracy and fluency- factors influence fluency, deliver a five-minute informal talk - greet - respond to greetings - describe health and symptoms - invite and offer - accept - decline - take leave - listen for and follow the gist- listen for detail

UNIT IV
Being an active listener: giving verbal and non-verbal feedback - participating in a group discussion - summarizing academic readings and lectures conversational speech listening to and participating in conversations - persuade.

UNIT V
Formal and informal talk - listen to follow and respond to explanations, directions and instructions in academic and business contexts - strategies for presentations and interactive communication - group/pair presentations - negotiate disagreement in group work.

TOTAL: 30 PERIODS

OUTCOMES: At the end of the course Learners will be able to:
- Listen and respond appropriately.
- Participate in group discussions
- Make effective presentations
- Participate confidently and appropriately in conversations both formal and informal

TEXT BOOKS:

REFERENCES
OBJECTIVE:
- To enable the students to learn about pre-treatments involved in the wet processing of textiles, dyeing and printing of textiles

UNIT I
Operation sequence in chemical processing of cotton, silk, wool, rayon, polyester, polyamide, polyester and cellulosic blend materials with emphasis on the objectives of each operation

UNIT II
Scouring; bleaching and mercerization of cotton; preparatory process for wool and silk

UNIT III
Stages involved in dyeing process, principle of application of direct, reactive, vat, acid, disperse and natural dyes; principles of working of loose fibre, yarn and fabric processing machines.

UNIT IV
Printing methods and styles of printing; general constitution of printing paste, printing with pigments, principles of transfer and ink-jet printing, dyeing and printing faults, assessment of fastness properties of dyed and printed goods; garment dyeing and washing; Finishing - Calendering, shrink proofing, antistatic finish, softening, water and flame proofing, UV protection, antimicrobial finish, resin finishing – crease recovery, wash and wear and durable press finishes; Standard methods of assessment of all the above finishes.

UNIT V
Fundamentals of colour science, assessment of colour of dyed and printed goods; basics of colour matching technique; assessment of whiteness and yellowness indices and colour difference; pass/fail decision making; Eco friendly chemical processes, banned dyes and chemicals.

OUTCOMES:
Upon completion of the course, the students will have knowledge on
- Chemical finishing treatment of textile materials
- Dyeing and printing of garments
- Eco friendly chemical processes

TEXT BOOKS:

REFERENCES:
OBJECTIVES:
- To impart knowledge on patterns for different types of collars and sleeves.
- To instruct on various styles of pockets and facings.
- To impart knowledge on patterns for top, bottom, knits, action wear and swim wear.
- To impart knowledge on pattern alterations and grading.

UNIT I PATTERNS FOR COLLARS AND SLEEVES 9
Collar classification and terms, basic shirt collar, Peter Pan collar, sailor collar, mandarin collar, built-up neck lines, Cowls, Sleeve cap, sleeve cuffs, puff, petal, lantern and leg-of-mutton sleeves.

UNIT II PATTERNS FOR POCKET, PLACKET AND FACINGS 6
Pocket classification, outside pockets, inserted pocket and side-seam pocket. Pointed, Slit opening and Wing collar plackets. Facing patterns for cutout necklines and armholes.

UNIT III FOUNDATIONS FOR TOPS AND BOTTOM WEAR 12

UNIT IV PATTERN FOR KNITS, ACTION WEAR AND SWIMWEAR 9

UNIT V PATTERN ALTERATIONS AND GRADING 9
Pattern alteration for fit, Factors affecting the pattern making process. Grading process, grade rules, and types of grading system.

TOTAL: 45 PERIODS

OUTCOMES:
After successful completion of this course, the students should be able to acquire knowledge on,
- Patterns for different types of collars and sleeves.
- Various styles of pockets and facings.
- Patterns for top, bottom, knits, action wear and swim wear.
- Pattern alterations and grading.

TEXT BOOKS:

REFERENCES:

TT8391 ENGINEERING MECHANICS FOR TEXTILE TECHNOLOGISTS L T P C
3 2 0 4

OBJECTIVE:
• To develop capacity to predict the effect of force and motion in the course of carrying out the design functions of engineering

UNIT I BASICS AND STATIC OF PARTICLES 15

UNIT II EQUILIBRIUM OF RIGID BODIES 15
Free body diagram – Types of supports –Action and reaction forces –stable equilibrium – Moments and Couples – Moment of a force about a point and about an axis – Vectorial representation of moments and couples – Scalar components of a moment – Varignon’s theorem – Single equivalent force -Equilibrium of Rigid bodies in two dimensions – Equilibrium of Rigid bodies in three dimensions

UNIT III PROPERTIES OF SURFACES AND SOLIDS 15

UNIT IV DYNAMICS OF BODIES 15

UNIT V FRICTION AND ELEMENTS OF RIGID BODY DYNAMICS 15
Friction force – Laws of sliding friction – equilibrium analysis of simple systems with sliding friction –wedge friction-. Rolling resistance -Translation and Rotation of Rigid Bodies – Velocity and acceleration – General Plane motion of simple rigid bodies such as cylinder, disc/wheel and sphere.

TOTAL: 75 PERIODS
OUTCOMES:
- Ability to explain the differential principles applies to solve engineering problems dealing with force, displacement, velocity and acceleration.
- Ability to analyse the forces in any structures.
- Ability to solve rigid body subjected to dynamic forces.

TEXT BOOKS:

REFERENCES:

FT8403                                      GARMENT PRODUCTION MACHINERY                           L T P C
                                                2 0 0 2

OBJECTIVES:
- To impart knowledge on the machineries and equipments used for garment production
- To instruct on latest developments in the garment production machineries.

UNIT I  SPREADING MACHINES                     6

UNIT II  CUTTING MACHINES                     6

UNIT III  SEWING MACHINES                     9

UNIT IV  MULTI THREAD SEWING MACHINES             9
Over lock machines - Types of Over lock machines. Parts and their functions. Threading diagram for over lock machines. Stitch Cycle Diagram for over lock machines – Adjustment of Needle height, Feed dog height, angle, Differential feed ratio, Position of upper and lower knives, looper. Defects and Remedies. Flat lock machines – Types. Parts and their functions. Threading diagram
of flat lock machines – Stitch cycle diagram. Adjustment of parts – Needle height, feed dog height, differential feed ratio, loopers.

TOTAL: 30 PERIODS

OUTCOMES:
After successful completion of this course, the students should be able to,

- Acquire knowledge in different methods of spreading of fabrics with respect to type of fabric and to calculate the marker efficiency.
- Describe the basic principles of working of different types of cutting machineries used in apparel production.
- Develop skill in setting and adjustment parts of sewing machines.
- Develop skills for recognize various parts and their working principles in advanced garment sewing machines.
- Acquire knowledge on special machineries used in apparel production

FT8491 FABRIC MANUFACTURING

OBJECTIVES:

- To teach preparatory processes and machinery for weaving
- To teach weaving and non-woven technologies of fabric manufacturing and the machinery used.

UNIT I

UNIT II

UNIT III

UNIT IV
Non-Woven fabrics - Types – different methods of production of non wovens, Properties and application of non woven fabrics.

TOTAL: 45 PERIODS

OUTCOMES:
After successful completion of this course, the students should be able to acquire knowledge on,

- Processes and machinery for weaving,
- Warp & weft knitting and non-woven technologies of fabric manufacturing and the machinery used.

**TEXT BOOKS:**

**REFERENCES:**

**FT8404 GARMENT CONSTRUCTION I**

**OBJECTIVES:**
- To teach the students about types of seams and stitches, sewing threads & their quality.
- To impart knowledge on various garment parts and their variations.
- To impart knowledge on use of accessories for garments.

**UNIT I SPREADING AND CUTTING**

**UNIT II BASIC SEWING TECHNIQUES**
Seams: Definition, Types of seams, seam quality, seam performance, factors to be considered in the selection of seam, seam finishes, seam defects. Stitches: Definition, stitch classes, stitch parameters, factors to be considered in the selection of stitches. Stitching defects. Sewing Thread: Types, construction, sewing thread quality, selection of sewing thread.

**UNIT III GARMENT COMPONENTS FOR MEN’S AND WOMEN’S TOP**
Men’s and women’s tops – basic bodice blocks, collars, sleeves, cuffs, plackets – types, pleats, gathers and darts, functional purpose of components in garment construction.

**UNIT IV GARMENT COMPONENTS FOR MEN’S AND WOMEN’S BOTTOM**
Men’s and women’s bottom – trousers basic blocks, pockets – side pocket, welt pocket, patch pocket, yoke, skirt basic blocks, waist bands, panels, other components in innerwear, functional purpose.
UNIT V ACCESSORIES

Labels, linings, interlinings, wadding, lace, braid, elastic, hook and loop fastening, shoulder pads, eyelets and laces, zip fasteners, buttons

TOTAL: 45 PERIODS

OUTCOMES:
After successful completion of this course, the students should be able to acquire knowledge on,
- Types of seams and stitches, sewing threads & their quality,
- Various garment parts and their variations,
- Use of accessories for garments.

TEXT BOOKS:

REFERENCES:

FT8411 PATTERN ENGINEERING LABORATORY II

OBJECTIVE:
- To train the students in pattern engineering of garments

LIST OF EXPERIMENTS
Development of patterns using drafting method of pattern making
1. Women - formal, casual and party wear
2. Men - formal, casual and party wear
3. Children - uniform, playtime wear and sleep suits.
4. Grading of patterns

Development of patterns using draping method of pattern making
1. Basic bodice – front and back
2. Bodice with dart variations
3. Gored, flared skirts, Jeans, jumpsuits
4. Sleeve’s, collar (convertible, peter-pan collar, turtle neck collar, shawl collar).
5. Neckline cowl, side seam cowl, bias cowl.

TOTAL: 60 PERIODS

OUTCOMES:
Upon completion of this practical course, the students will be able to
- Develop patterns for women’s, men’s and children’s garments
- Do grading of patterns
- Develop patterns for basic bodice, gored, flared skirts, jeans and jumpsuits

LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS
- Working surface – pattern making / cutting table (polished or laminated top)- 5 no.
OBJECTIVE:
- To train the students in fundamentals of garment construction.

LIST OF EXPERIMENTS
1. Stitch classification and stitch properties.
2. Formation of Stitch classes.
3. Seam classification and common uses.
5. Button hole and button stitch machine.
6. Study of Feed-of-the-arm machine.
7. Assembling of various garment components using appropriate seams.

TOTAL: 60 PERIODS

OUTCOMES:
Upon completion of this practical course, the students will be able to
- Develop samples using various stitch classes and seams.
- Develop samples in various special machines.
- Develop various garment components.

LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS
High speed industrial sewing machines
- Single needle lock stitch machine - 15 Nos.
- Double needle lock stitch machine - 02 Nos.
- Over-lock machine - 02 Nos.
- Feed-of-the-arm machine - 01 No.
- Button stitch machine - 01 No.
- Button hole machine - 01 No.
- Flat lock machine - 01 No.
- Zigzag machine - 01 No.
- Straight knife cutting machine - 01 No.
- Steam pressing table (Desirable) - 01 No.
UNIT I
Reading - Strategies for effective reading-Use glosses and footnotes to aid reading comprehension- Read and recognize different text types-Predicting content using photos and title Writing-Plan before writing- Develop a paragraph: topic sentence, supporting sentences, concluding sentence –Write a descriptive paragraph

UNIT II
Reading-Read for details-Use of graphic organizers to review and aid comprehension Writing- State reasons and examples to support ideas in writing- Write a paragraph with reasons and examples- Write an opinion paragraph

UNIT III
Reading- Understanding pronoun reference and use of connectors in a passage- speed reading techniques-Writing- Elements of a good essay-Types of essays- descriptive-narrative-issue-based-argumentative-analytical.

UNIT IV
Reading- Genre and Organization of Ideas- Writing- Email writing- visumes – Job application-project writing-writing convincing proposals.

UNIT V
Reading- Critical reading and thinking- understanding how the text positions the reader-identify Writing- Statement of Purpose- letter of recommendation- Vision statement

TOTAL: 30 PERIODS

OUTCOMES: At the end of the course Learners will be able to:
- Write different types of essays.
- Write winning job applications.
- Read and evaluate texts critically.
- Display critical thinking in various professional contexts.

TEXT BOOKS:

REFERENCES
OBJECTIVES:
- To teach the students about operation breakdown for various garments.
- To impart knowledge on various production systems and inspection.
- To impart knowledge on finishing of garments.

UNIT I
Operation breakdown for shirts, trousers, jackets, waist coats, T-shirts, casual bottoms, material flow, cut component progresses, machinery allocation, man power allocation.

UNIT II
Operation breakdown for blouse variations, dresses, skirt variations, kameez, salwar, lingerie, material flow, cut component progresses, machinery allocation, man power allocation.

UNIT III
Line set up, production line balancing, different production system, manual system, make through system, batch production system, progressive bundle system, straight line system, progressive bundle system, conveyor belt system, unit production system, modular production system, quick response system and Just in time system.

UNIT IV
Raw material, in process and final inspection, analysis of sewing ability of fabrics, care labeling.

OUTCOMES:
Upon completion of this course, the students will be able to know,
- Operation breakdown for various mens's and women's garments
- Different manufacturing systems and inspection
- Garment dyeing and finishing

TEXT BOOKS:

REFERENCES:
To enable the students to learn about structure of fabric and design the structure for different applications.

UNIT I
Elementary weaves – plain and its derivatives, twill and its derivatives, satin, sateen and their derivatives – loom requirements

UNIT II
Ordinary and Brighten Honey Comb; Huck-a-Back and its modifications; Mock Leno; crepe weaves; colour theory – light and pigment theory; modification of colour; application of colours; colour and weave effects – loom requirements

UNIT III
Bedford cords - plain and twill faced, wadded; welts and piques, wadded piques; backed fabrics - warp and weft, reversible and non-reversible fabrics; extra warp and extra weft figuring - single and double colour – loom requirements

UNIT IV
Pile fabrics; warp pile - wire pile, terry pile, loose backed; weft pile – plain back and twill back velveteen, lashed pile, corduroy, weft plush – loom requirements

UNIT V
Double cloth, types of stitches; Damasks; Gauze and Leno principles – loom requirements, 3D woven structures.

TOTAL: 45 PERIODS

OUTCOMES:
Upon the completion of this course the student will be able to

- Understand different structures of woven fabric
- Design the structure for different end uses
- Construct the draft and peg-plan which are required to convert the design into fabric

TEXT BOOKS:

REFERENCES:

GE8291 ENVIRONMENTAL SCIENCE AND ENGINEERING

OBJECTIVES:
- To study the nature and facts about environment.
- To finding and implementing scientific, technological, economic and political solutions to environmental problems.
• To study the interrelationship between living organism and environment.
• To appreciate the importance of environment by assessing its impact on the human world; envision the surrounding environment, its functions and its value.
• To study the dynamic processes and understand the features of the earth’s interior and surface.
• To study the integrated themes and biodiversity, natural resources, pollution control and waste management.

UNIT I ENVIRONMENT, ECOSYSTEMS AND BIODIVERSITY
Definition, scope and importance of environment – need for public awareness - concept of an ecosystem – structure and function of an ecosystem – producers, consumers and decomposers – energy flow in the ecosystem – ecological succession – food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and function of the (a) forest ecosystem (b) grassland ecosystem (c) desert ecosystem (d) aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries) – Introduction to biodiversity definition: genetic, species and ecosystem diversity – biogeographical classification of India – value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values – Biodiversity at global, national and local levels – India as a mega-diversity nation – hot-spots of biodiversity – threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts – endangered and endemic species of India – conservation of biodiversity: In-situ and ex-situ conservation of biodiversity. Field study of common plants, insects, birds; Field study of simple ecosystems – pond, river, hill slopes, etc.

UNIT II ENVIRONMENTAL POLLUTION
Definition – causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards – solid waste management: causes, effects and control measures of municipal solid wastes – role of an individual in prevention of pollution – pollution case studies – disaster management: floods, earthquake, cyclone and landslides. Field study of local polluted site – Urban / Rural / Industrial / Agricultural.

UNIT III NATURAL RESOURCES
Forest resources: Use and over-exploitation, deforestation, case studies- timber extraction, mining, dams and their effects on forests and tribal people – Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems – Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies – Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies – Energy resources: Growing energy needs, renewable and non renewable energy sources, use of alternate energy sources. case studies – Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification – role of an individual in conservation of natural resources – Equitable use of resources for sustainable lifestyles. Field study of local area to document environmental assets – river / forest / grassland / hill / mountain.

UNIT IV SOCIAL ISSUES AND THE ENVIRONMENT
From unsustainable to sustainable development – urban problems related to energy – water conservation, rain water harvesting, watershed management – resettlement and rehabilitation of people; its problems and concerns, case studies – role of non-governmental organization- environmental ethics: Issues and possible solutions – climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust, case studies. – wasteland reclamation – consumerism and waste products – environment production act – Air
UNIT V  HUMAN POPULATION AND THE ENVIRONMENT

Population growth, variation among nations – population explosion – family welfare programme –
environment and human health – human rights – value education – HIV / AIDS – women and
child welfare – role of information technology in environment and human health – Case studies.

OUTCOMES:
- Environmental Pollution or problems cannot be solved by mere laws. Public participation is
an important aspect which serves the environmental Protection. One will obtain knowledge
on the following after completing the course.
- Public awareness of environmental is at infant stage.
- Ignorance and incomplete knowledge has lead to misconceptions
- Development and improvement in std. of living has lead to serious environmental disasters

TEXT BOOKS:
1. Benny Joseph, "Environmental Science and Engineering", Tata McGraw-Hill, New Delhi,
   2006.
2. Gilbert M. Masters, "Introduction to Environmental Engineering and Science", 2nd edition,

REFERENCES:
1. Dharmendra S. Sengar, "Environmental law", Prentice hall of India Pvt Ltd, New Delhi,
   2007.
2. Erach Bharucha, “Textbook of Environmental Studies”, Universities Press(I) PVT, LTD,
   Hydrabad, 2015.
3. Rajagopalan, R, "Environmental Studies-From Crisis to Cure", Oxford University Press,
   2005.
4. G. Tyler Miller and Scott E. Spoolman, “Environmental Science”, Cengage Learning India
   PVT, LTD, Delhi, 2014.

OBJECTIVE:
- To train the students in pre treatment and wet processing of textile materials

LIST OF EXPERIMENTS
2. Peroxide Bleaching of Cotton Yarn/Fabric.
3. Degumming of silk.
4. Identification of dyes
7. Dyeing of polyester using disperse dyes.
8. Dyeing of polyester and cotton blend
11. Determination of Whiteness and Yellowness index
12. Determination of K/S of dyed fabrics using Spectrophotometer
15. Antimicrobial Finish Evaluation

TOTAL: 60 PERIODS

OUTCOME:

- Upon completing this practical course, the student would be able to desize, bleach, dye, print and finish the fabric with different types of chemicals and colourants

LAB EQUIPMENTS

LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS

1. Stainless vats (500 ml) - 30 Nos.
2. Water bath - 2 Nos.
3. Stirrer - 1 No.
4. Steam ager - 1 No.
5. Pilot padding mangle - 1 No.
6. HTHP Beaker dyeing machine - 1 No.
7. Pilot curing chamber - 1 No.
8. Fastness tester for Washing, Light, Perspiration & Rubbing - 1 No.
10. Spectrophotometer - 1 No.

FT8511 GARMENT CONSTRUCTION LABORATORY II L T P C
0 0 4 2

OBJECTIVE:

- To train the students in garment construction.

LIST OF EXPERIMENTS

1. Sewing and finishing of men’s top wear.
2. Sewing and finishing of men’s bottom wear.
3. Sewing and finishing of women’s top wear.
4. Sewing and finishing of women’s bottom wear.
5. Sewing and finishing of kid’s wear (boy and girl).

TOTAL: 60 PERIODS

OUTCOME:

- Upon completion of this practical course, the students will be able to construct various garments for men, women and children.

LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS

- Single needle lock stitch machine - 15 Nos.
- Flat lock machine with elastic attachment - 1 No.
- Feed off the arm machine - 1 No.
- Over lock machine - 2 Nos.
- Button holing & button attachment machine - 1 No. each
- Cylinder bed Sewing machines - 1 No. (Preferable)
- Collar & Cuff recessing machine - 1 No. (Preferable)
OBJECTIVE:
- To train the students in analyzing the cloth to identify construction parameters and prepare design, draft and peg plan.

Analysis of construction details of the following fabric structure
1. Plain and its derivatives
2. Twill and its derivatives
3. Satin (Regular and irregular)
4. Satin (Regular and irregular)
5. Honeycomb (ordinary and Brighton)
6. Huck-a-back
7. Extra warp and extra weft figuring
8. Pile fabrics (warp and weft)
9. Backed fabrics
10. Gauze and Leno
11. Double cloth
12. Crepe
13. Tapestry
14. Mock-leno
15. Bedford cord.
16. Single jersey
17. Double jersey structures
18. Analysis of blend composition in the yarn of the fabric
19. Analysis of finish on the fabric

TOTAL: 60 PERIODS

OUTCOMES:
Upon completion of the lab the student will be able
- Identify the constructional parameters of fabric
- Construct design, draft and peg plan for weaving the fabric
- Analyse the blend composition of yarn used in the fabric and the type of finish applied in the fabric

LAB EQUIPMENTS
LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS
1. GSM Cutter – 3 Nos.
3. Crimp Tester – 2 Nos.
4. Electronic balance – 1 No.

OBJECTIVES:
The course aims to:
- Enhance the Employability and Career Skills of students
- Orient the students towards grooming as a professional
- Make them Employable Graduates
- Develop their confidence and help them attend interviews successfully
UNIT I
Introduction to Soft Skills— Hard skills & soft skills - employability and career Skills—Grooming as a professional with values—Time Management—General awareness of Current Affairs

UNIT II
Self-Introduction-organizing the material - Introducing oneself to the audience – introducing the topic – answering questions – individual presentation practice— presenting the visuals effectively – 5 minute presentations

UNIT III
Introduction to Group Discussion— Participating in group discussions – understanding group dynamics - brainstorming the topic — questioning and clarifying –GD strategies- activities to improve GD skills

UNIT IV
Interview etiquette – dress code – body language – attending job interviews– telephone/skype interview -one to one interview & panel interview – FAQs related to job interviews

UNIT V
Recognizing differences between groups and teams- managing time-managing stress- networking professionally- respecting social protocols-understanding career management-developing a long-term career plan-making career changes

TOTLA: 30 PERIODS

OUTCOMES:
At the end of the course Learners will be able to:
• Make effective presentations
• Participate confidently in Group Discussions.
• Attend job interviews and be successful in them.
• Develop adequate Soft Skills required for the workplace

Recommended Software
1. Open Source Software
2. Win English

REFERENCES:

FT8652 INDUSTRIAL ENGINEERING IN APPAREL INDUSTRY

OBJECTIVES:
To enable the students to learn about
• Basics of industrial engineering
• Different tools of industrial engineering and its application in apparel industry
UNIT I
Industrial Engineering - evolution, functions, role of industrial engineer

UNIT II
Methods study – introduction, techniques of recording; method analysis techniques; principles of motion economy; method study in garment manufacture; ergonomics- importance, workplace design, fatigue

UNIT III
Work measurement – introduction; time study – equipment and procedure; standard data; predetermined time standards; work sampling techniques; incentive wage system; work measurement applied to garment industry

UNIT IV
Site selection for textile industry; plant layout - types of layouts suitable for textile industry, methods to construct layout; line balancing

UNIT V
Statistical Process Control – data collection; concept of AQL, control charts in quality control; process capability

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course the student will be able to apply the following methodologies in apparel industry.

- Method study, work measurement
- Layout study and line balancing
- Statistical process control

TEXT BOOKS:

REFERENCES:
OBJECTIVE:
- To infuse understanding of yarn, fabric and apparel testing methods

UNIT I CONSTRUCTION CHARACTERISTICS
Basic fabric particulars – Measurement of ends and picks per inch, count of warp and weft, determination of the type of weave, measurement of length, width, thickness and Area density (GSM); warp and weft crimp measurements for spun and filament yarn fabrics, the cover factor calculations; Fabric sampling techniques

UNIT II STRENGTH CHARACTERISTICS

UNIT III COMFORT AND SURFACE CHARACTERISTICS
Fabric stiffness – principle of measurement of flexural rigidity; Drapeability – measurement of drape coefficient; Crease recovery measurement techniques. Wrinkle recovery assessment using standard grades; Principle and functioning of air permeability testers, water repellency, contact angle and fabric shrinkage testing; Fabric abrasion resistance – measuring technique; Fabric pilling resistance – methods of determination.

UNIT IV SPECIAL CHARACTERISTICS
Fabric bending hysteresis testing; Shear hysteresis measurements; Fabric compression and decompression behaviour; Fabric surface roughness and friction measurements; Fabric tensile hysteresis measurements; Fabric flame resistance testing methods; Moisture and thermal characteristics.

UNIT V FABRIC AND GARMENT INSPECTION

OUTCOMES:
The student will have knowledge on
- Methods by which the physical and mechanical properties of textile materials and products are measured and investigated
- Sampling and yarn quality parameters testing
- Fabric and garment quality parameters testing

**OBJECTIVES:**
- To emphasis on the improved methods of material control in apparel production
- To acquaint student with quality concepts for implementing quality in apparel production

**UNIT I**  
Control parameters and basic data of styles and generalised garment types, new program analysis, style wise design wise analysis on production parameters, product development and duplication. Concepts of concurrent engineering, reverse engineering, production planning and time and action calendar, steps between prototypes to approved sample-production sample, product data management and understanding specification sheets and effective communication.

**UNIT II**  
Operation break down and production sequence, identification of bottle necks and critical area, operation wise machinery allocation, usage of special attachments and tools for operation simplifications, production grid and flow chart.

**UNIT III**  
Cutting techniques, cutting room controls, lay lot planning, bundle distributions, modern methods in cut piece distribution and tracking different manufacturing systems, mass customisation and made to order manufacturing systems advantages disadvantages and control measures in sewing.

**UNIT IV**  
Production planning -Production floor balancing, line balancing, allocation of man power, production set up planning for a shirt factory, production set up planning for a bottoms and jacket factory, production set up planning for a fully integrated apparel manufacturing plant, conveyor system and control parameters.

**UNIT V**  
Quality control in product development, quality control in printing, embroidery, washing and other accessories, quality planning, preproduction meetings and quality procedures, production meetings, in line inspection, final inspection, rescreening conditions and final inspections. Packing-Ratio packing, solid packing, short shipment, excess shipment, calculation of volumetric weight, carton dimension other requirements.

**TOTAL: 45 PERIODS**
OUTCOME:
- The course will enable students to practise better methods in apparel production and planning to take informed business decisions in the apparel industry

TEXT BOOKS:

FT8651                  APPAREL MARKETING AND MERCHANDISING          L  T  P  C
                                      3 0 0 3

OBJECTIVE:
- To acquaint the students of the concepts of business, merchandising, sourcing and export documentation

UNIT I INTRODUCTION TO APPAREL BUSINESS  9
International apparel business pattern, basic business concepts in Indian apparel export house, business operations in China and other south Asian countries. Business patterns for Indian apparel retail and home textiles. Understanding from concept board to finished product and its sequence.

UNIT II MARKETING FOR APPAREL AND TEXTILE PRODUCTS  9
Defining marketing, marketing mix the objectives of marketing department, market research, different types of markets, marketing strategies with respect to a product/brand, Indian apparel houses international marketing strategies and domestic marketing strategies, marketing models, B to B marketing, B to C marketing, direct marketing, digital marketing.

UNIT III MERCHANDISING  9
Concepts of merchandising, concepts and apparel product lines, dimensions of product change, determination and development of product line and product range. Creative and technical design in garments and accessories, new product development and seasons of sale, costing, coordination and communication with the production house and export house

UNIT IV SOURCING  9
Understanding the basics of sourcing, sourcing strategy and best sourcing practice in apparel and textile businesses, supply chain and demand chain understanding, sourcing negotiations, global co-ordination in sourcing, materials management and quality in sourcing, quick response and supplier partnership in sourcing, JIT technology.
UNIT V EXPORT DOCUMENTATION AND POLICIES
Government policies a guide lines for apparel export and domestic trade, tax structures and
government incentives in apparel trade. Export documents and its purposes, banking activities,
Letter of credit, logistics and shipping, foreign exchange regulation, export risk management and
insurance. Export finance, Special economic zones.

OUTCOMES:
Upon completion of this course, the student shall be able to apply
- Concept of marketing and merchandizing in the apparel industry in India
- Procedure involved in the export of apparel

TEXT BOOKS:
2. Philip Kotler, Kevin Lane Keller, Abraham Koshy, and Mithileshwar Jha , “Marketing
   Management A South Asian Perspective”, Pearson Education, New Delhi, 2006
3. Ruth E. Glock, Grace I. Kunz " Apparel Manufacturing Sewn Product Analysis" Fourth

FT8602 KNIT FABRIC PRODUCTION L T P C
2 0 0 2

OBJECTIVES:
- To teach the students about introduction and classification of knitting process.
- To impart knowledge on principles of knitting and types of needles.
- To impart knowledge on weft and warp knitting.

UNIT I INTRODUCTION 3
Reasons for the growth of the knitting industry. Comparison of fabric properties - wovens, knits
and bonded fabrics; classification of knitting processes – weft knit & warp knit; yarn quality
requirements for knitting.

UNIT II FUNDAMENTALS OF KNITTING 6
General definitions and principles of knitting; Types of knitting needles – Bearded, Latch &
Compound Needle. Elements of knitted loop structure.

UNIT III WEFT KNITTING 15
Basic weft knitted structures and their production - plain, rib, interlock and purl; Fundamentals of
formation of knit, tuck and float stitches; factors affecting the formation of loop; effect of loop length
and shape on fabric properties; Analysis of various types of weft knitted structure. Production of
various weft knitted structures using flat knitting machines.
UNIT IV WARP KNITTING

Basic principles; elements of warp knitted loop – open loop, closed loop. Tricot and Rachel warp knitting machines. Warp knitted fabrics – Structures and End uses.

TOTAL: 30 PERIODS

OUTCOMES:
Upon completion of this course, the students will be able to know,

- basics of knitting and its principles
- basic principles of weft and warp knitting.

TEXT BOOKS:

REFERENCES:

FT8611 FASHION DESIGN LABORATORY L T P C
0 0 4 2

OBJECTIVE:
- To train the students in fashion design.

DEVELOPMENT AND DESIGNING MEN’S WEAR FOR VARIOUS SEASONS AND ILLUSTRATIONS WITH FABRIC PATTERNS
1. Sketching with solid colors,
2. Sketching with stripes
3. Sketching with checks and plaids
4. Designing formal wear & work wear
5. Designing casual wear
6. Designing party wear

DEVELOPMENT AND DESIGNING WOMEN’S DRESSES FOR VARIOUS SEASONS AND ILLUSTRATION WITH FABRIC PATTERNS
1. Experiment on draping of fabrics in female dress form.
2. Sketching with colors and motifs
3. Designing formal wear & work wear
4. Designing casual wear
5. Designing party wear
6. Designing bridal wear
7. Designing functional and maternity dresses

CHILDREN DRESSING
1. Develop garment designs with comfort, fit and functionality
2. Sketching with colors and motifs
3. Designing casual wear
4. Designing uniforms

OUTCOME:
- Upon completion of this practical course, the student would be able to design men's, women's, children's garments.

TOTAL: 60 PERIODS

LAB EQUIPMENTS FOR A BATCH OF 30 STUDENTS
- Drawing tables - 15 Nos.

FT8661 TEXTILE QUALITY EVALUATION LABORATORY

OBJECTIVE:
- To make the students practically learn various fibre, yarn and fabric evaluation procedures to determine characteristics of fibres, yarn and fabric

LIST OF EXPERIMENTS
Determination of
1. Fibre fineness, length and maturity
2. Fibre trash content, Bundle fibre strength
3. Sliver/roving/ yarn linear density
4. Single yarn strength and Yarn Lea strength
5. Yarn single and ply yarn twist
6. Unevenness of yarn and assessment of yarn appearance
7. Fabric tensile strength
8. Fabric tear and bursting strength
9. Fabric flexural rigidity, bending modulus and crease recovery
10. Drapeability of fabrics
11. Fabric abrasion and pilling resistance
12. Fabric air permeability and thickness
13. Seam strength and seam slippage

OUTCOMES:
Upon completion the students will be able to
- Measure important characteristics of fabric and garment
- Interpret the results obtained during evaluation of fabrics

TOTAL: 60 PERIODS

LAB EQUIPMENTS
LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS
Baer Sorter - 1 No.
Fibre Bundle strength tester - 1 No.
Fibre Fineness tester - 1 No.
Trash Analyser - 1 No.
Projection Microscope - 1 No.
Wrap Reel - 1 No.
Wrap Block - 1 No.
Yarn Twist Tester - 1 No.
Single Yarn Strength Tester - 1 No.
Bundle yarn strength tester - 1 No.
Ballistic Tester - 1 No.
Yarn Unevenness tester - 1 No.
Weighing balance - 1 No.
Yarn appearance Board Winder - 1 No.
Yarn appearance Board (Standards) - 1 No.
Fabric tensile strength tester - 1 No.
Fabric tearing strength tester - 1 No.
Fabric Thickness Tester - 1 No.
Fabric Stiffness Tester - 1 No.
Fabric Crease Recovery Tester - 1 No.
Fabric Bursting Strength Tester - 1 No.
Fabric Abrasion Resistance Tester - 1 No.
Fabric Pilling resistance tester - 1 No.
Fabric air permeability tester - 1 No.
Fabric Drape meter - 1 No.

**FT8612 GARMENT MACHINERY LABORATORY**

**OBJECTIVE:**
- To enable students to understand about the garment machineries.

**LIST OF EXPERIMENTS**
Performing a study of,

1. A Single-Needle Lock Stitch machine for its parts and various settings points and its threading; preparing stitch samples by using various folders and calculating the SPI for specified/chosen stitch lengths
2. A Double-Needle Lock Stitch machine for its parts, various settings points and its threading; preparing stitch samples and calculating the SPI for given stitch lengths
3. An Over-lock machine for its parts, various settings points and its threading; preparing stitch samples
4. An Over-lock machine for making adjustments of the needle-thread and looper thread tension, feed-ratio, needle-and-looper setting and knife setting
5. A Flat-lock machine for its parts, various settings points and its threading; preparing stitch samples
6. A Flat-lock machine for making adjustments of the needle-thread and looper-thread tensions, feed-ratio, needle-and-looper setting and spreader setting
7. A Button-holing machine for its parts, various settings points and its threading and prepare samples
8. A Feed-off-the-arm machine for its parts, various settings points and its threading and prepare stitch samples

**OUTCOME:**
- Upon the completion of this lab, the students will be able to understand the mechanism, machine settings and produce the samples from various garment machineries.

**LAB EQUIPMENT FOR A BATCH OF 30 STUDENTS**
Single needle lock stitch machine - 15 Nos.
Double needle lockstitch machine - 2 Nos.
Flat lock machine with elastic attachment - 1 No.
Feed off the arm machine - 1 No.
Over lock machine - 2 Nos.
Button holing & button attachment machine - 1 each

TOTAL: 30 PERIODS

FT8701  
APPAREL COSTING  
L T P C  
3 0 0 3

OBJECTIVE:
- To learn apparel costing, budgeting and working capital management

UNIT I
Cost accounting, elements of cost, classification of cost elements – examples from apparel industry; standard costing, analysis of variance; breakeven analysis, cost volume profit analysis

UNIT II
Costing of fabrics; costing of apparel – woven, knits of various styles, accounting of prime costs and overhead costs, allocation of overheads, cost control; cost sheet preparation

UNIT III
Working capital management in garment unit – determination, sources, cost; Budget, types of budgets, budgeting and control in apparel industry

UNIT IV
Detailed project report – elements, preparation for a garment unit

TOTAL: 45 PERIODS

OUTCOMES:
At the end of this course, the students would have knowledge on
- Cost accounting and cost elements
- Cost elements involved in fabric and apparel costing
- Working capital management
- Detailed project report preparation

TEXT BOOKS:

REFERENCES:

FT8702  
GARMENT FINISHING AND CLOTHING CARE  
L T P C  
3 0 0 3

OBJECTIVE:
- To educate the students in techniques and machinery for dyeing and finishing of garments and to impart knowledge on different garment care techniques.
UNIT I                        9
Garment dyeing, dye selection, garment-dyeing machinery. Washing: Stone washing, acid
washing, enzyme washing, biopolishing, mercerisation, bleaching, laser fading and ozone fading.

UNIT II                        9
Study of laundry equipment and reagents – soaps – detergents – cleaning action of soaps, study
of modern and industrial cleaning agents. Finishing; Optical brightening, mercerization, liquid
ammonia, treatment, stiffening, softening, crease resistant and crease retentive finish, anti-static
finish, anti-bacterial finish, water proofing, flame proofing, soil release finish, mildew and moth
proofing.

UNIT III                       9
Study of garment finishing room equipments – steam iron – steam busters – vacuum ironing
tables– form finishing equipments – trouser topper, shirt press, collar/cuff press, form finisher for
jackets and coats – study of boiler and related equipment for finishing room. Fusing machines for
interlinings

UNIT IV                      9
Principles of laundering – stain removal – various solvents for stain removing blood, tea, rust,
oil/grease etc. – different methods of washing – application of friction by hand rubbing – scribing –
tumble wash

UNIT V                      9
Stain removal – Oil, colour matter, chemicals. Use of care labels and standards / norms for care
labels. Garment laundering equipments and procedures. Study of different types of house
hold/industrial washing machines- rotary –swirling – pressure – tumble wash etc

TOTAL: 45 PERIODS

OUTCOMES:
The students would have knowledge on
- Dyeing techniques for apparel
- Applying of different finishes on garments
- Machinery and equipments for garment care

TEXT BOOKS:
Delhi, 1980.
3. Harrison. P (Editor), “Garment Dyeing: Ready to wear fashion from the dye house”, The
4. Noemia D’ Souza., “Fabric Care”, New Age International (P) Ltd. Publisher, Chennai,
1998.

FT8703             GARMENT ACCESSORIES AND EMBELLISHMENTS                   L  T  P  C
3   0  0  3

OBJECTIVE:
To introduce students to different trims, components and fashion accessories used in apparel industry to enhance value addition

UNIT I
Garment components and trimmings – labels and motifs, linings, interlining wadding, lace, braid and elastic, seam binding and tape, shoulder pads, eyelets and laces, zip fasteners, buttons – tack buttons, snap fastener and rivets; buckles, frag closures, belts, ribbons, fringe, emblems and sequins, decorative and functional trimmings; performance properties of components and trims.

UNIT II
Hook and loop fastening (Velcro), Zippers – anatomy of zipper, types, function of zipper, position of slider, standards on zipper, selection of zipper, application of zipper, shortening of zipper; evaluation of quality of accessories

UNIT III
Embroideries - basic embroidery stitches – chain stitch, button hole stitch, herringbone stitch, feather stitch, lazy daisy, double knot stitch, interlacing stitch, stem stitch, French knot stitch, types of embroidery machines, limitations of hand embroidery; kaustic embroidery; kasida, kathiwar; Sind; chickankari; zardosi; tribal embroideries.

UNIT IV
Fashion accessories – footwear, handbags, gloves, hats, scarves, hosiery, jewelry, watches; testing of zippers, elastic waist band testing, fusible interlinings; safety issues for different accessories in children garment.

UNIT V
Printing – introduction; different methods – block printing, roller, screen, discharge, resist and pigment; styles of printing - batik, tie and dye, patch work, appliqué work, bead work

OUTCOMES:
Upon completion of this practical course, the students shall understand
- Different types of accessories used for garments
- Different types of embroideries
- Different types of printing

TEXT BOOKS:

REFERENCES:

FT8711 COMPUTER AIDED GARMENT DESIGN LABORATORY
OBJECTIVE:
• To train the students in CAD used for pattern making of garments and marker planning

LIST OF EXPERIMENTS
1. Development of the basic Blocks for Men and Women (top and bottom)
2. Pattern for Men’s Formal shirt
3. Pattern for Men’s formal trouser (pleats and Flange)
4. Pattern for Women’s Tops (application of Dart manipulation principle)
5. Pattern for Women’s Bottoms (skirts, pants – Added fullness techniques Gatherings and pleats)
6. Patterns for children’s dresses (principles of contouring applied)
7. Patterns for Dungaree and work wear
8. Patterns for Close fitting body shapes
9. Reverse pattern Engineering
10. Grading rules
11. Marker planning and optimization

TOTAL: 60 PERIODS

OUTCOME:
• Upon completion of this course the student will have practical experience on pattern making of different wears, marker planning and optimization.

LIST OF EQUIPMENT FOR BATCH OF 30 STUDENTS
• Computer with Marker planning software - 15 Users.
• Pattern Digitizer - 02 Nos.
• Printer / plotter (above 42’’) - 01 No.

FT8811 PROJECT WORK

OBJECTIVE:
• To objective of the project work is to make use of the knowledge gained by the student at various stages of the degree programme.

The students are assigned project work related to product / process development, solution to the technical problems in industry and current research at national and international level. The student is required to submit a report at the end of semester based on the findings. The evaluation is made as per the Regulations of University.
OBJECTIVES

- To impart knowledge on role and importance of computer in apparel industry.
- To impart knowledge on 3D garment design and modeling techniques.
- To impart knowledge on digital printing and CAD on textile product design.

UNIT I
Introduction, Technologies in Apparel Manufacturing, Role of computers in apparel industry – digitizing, grading, marker making, cutting, Importance of computer in the field of designing in apparel industry.

UNIT II
Techniques for 3D garment design - Sketch-based garment design, Surface flattening for virtual garments, Online garment-shopping system: problems and solutions.

UNIT III
Model development, Computer graphics techniques for garment structure and appearance, Rendering of garment appearance and model demonstration for garments, Advanced modeling techniques.

UNIT IV
Digital printing technology for textiles and apparel, global developments in digital printing technology, colour technology and colour management, stages of computing for digital printing.

UNIT V
3D technologies for apparel and textile design, applications of 3D human body modeling, Animations, Conventional design, development and production processes for apparel, Role of CAD and visualization technologies in integrated textile product design.

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course, students shall able to know about,

- Role and importance of computer in apparel industry.
- 3D garment design and modeling techniques
- Digital printing and CAD on textile product design

TEXT BOOKS:

REFERENCES:
OBJECTIVE:

- To enable the students to learn about design and production of different garments

UNIT I  INTRODUCTION
Introduction to knitted materials types and features; grain, support and shape trims, linings and interlinings; requirements for sewing knitted fabrics; compression garments

UNIT II  CHILDREN’S WEAR
Construction of Children’s wear - stitches, seams, sewing and special machine selection and assembly operations; Rompers, Creeper, Jumpsuit, leggings and skirts

UNIT III  WOMEN’S WEAR
Women’s wear construction- stitches, seams, sewing and special machine selection and assembly operations – Tunic, Tank Tops, Sports tops, Capri, Legging

UNIT IV  MEN’S WEAR
Construction and assembly of men’s wear - stitches, seams, sewing and special machine selection and assembly operations; T-Shirts, Polo Shirts, Raglon, Kimono Tee’s, Cap’s, Active wear, Sweat shirts, Hooded and non-hooded jackets

UNIT V  INTIMATE APPARELS
Construction of Intimate apparels of men’s and women’s- assembly of men’s wear - stitches, seams, sewing and special machine selection and assembly operations; Vests, Briefs, women’s Hipster, panties, bikini, thong, brassier and trunks

TOTAL: 45 PERIODS

OUTCOME:
- Upon completion of this course, the students shall be able to select the fabric and design the garment for children, women and men.

TEXT BOOKS:

REFERENCES:

OBJECTIVES:
- To impart knowledge on enterprise resource planning and implementation in apparel.
• To impart knowledge on management information system, its function and characteristics.

UNIT I 9
Enterprise Resource Planning - principle, framework, application and suitability in garment production

UNIT II 9
Client/Server architecture; technology choices; SCM, CRM – concepts, Business Process Reengineering, Data ware Housing, Data mining, ERP system packages.

UNIT III 9
ERP implementation strategies – organizational and social issues, data safety & security, ERP implementation in a garment production facility

UNIT IV 9
Management Information System – management, key aspects of management, functions, management as a control system, levels of management.

UNIT V 9
Information – requirements, properties and scope, information economics, types and characteristics.

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course, students shall able to know about,
• enterprise resource planning and implementation in apparel management information system, its function and characteristics

TEXT BOOKS:

REFERENCES:

TT8092 DENIM MANUFACTURING L T P C
3 0 0 3

OBJECTIVES:
To enable the students to learn about
• Requirement of fibre, yarn
• Production of fabric, dyeing and finishing
• Stitching for denim garments

UNIT I
An overview on denim and jeans; fiber qualities for denim yarn production; yarns for denim production and their characteristics

UNIT II
Indigo dye and its reduction; dyeing technology of denim yarns; non-indigo dyes for denims; weaving and finishing of denim fabrics.

UNIT III
Denim garment manufacture - types of garments and production sequence, seams and stitches, sewing threads and needles, sewing machines, fastenings, trims, pressing and Inspection.

UNIT IV
Dry and wet finishes to produce effects and colours on denim garments; novel denims

UNIT V
Dyeing of denim garments; digital printing of denim garments; comfort aspects of denim

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course, the students shall know about
• Fibres and yarns used for production of denim garments
• Weaving and chemical processing of denim fabrics
• Stitching and finishing of denim garments

TEXT BOOKS:

REFERENCES:

GE8071 DISASTER MANAGEMENT L T P C 3 0 0 3

OBJECTIVES:
• To provide students an exposure to disasters, their significance and types.
• To ensure that students begin to understand the relationship between vulnerability, disasters, disaster prevention and risk reduction
• To gain a preliminary understanding of approaches of Disaster Risk Reduction (DRR)
• To enhance awareness of institutional processes in the country and
• To develop rudimentary ability to respond to their surroundings with potential disaster response in areas where they live, with due sensitivity

UNIT I INTRODUCTION TO DISASTERS
Definition: Disaster, Hazard, Vulnerability, Resilience, Risks – Disasters: Types of disasters – Earthquake, Landslide, Flood, Drought, Fire etc - Classification, Causes, Impacts including social,
economic, political, environmental, health, psychosocial, etc.- Differential impacts- in terms of caste, class, gender, age, location, disability - Global trends in disasters: urban disasters, pandemics, complex emergencies, Climate change- Dos and Don’ts during various types of Disasters.

UNIT II  APPROACHES TO DISASTER RISK REDUCTION (DRR)                                      9
Disaster cycle - Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, Roles and responsibilities of- community, Panchayati Raj Institutions/Urban Local Bodies (PRIs/ULBs), States, Centre, and other stake-holders- Institutional Processess and Framework at State and Central Level- State Disaster Management Authority(SDMA) – Early Warning System – Advisories from Appropriate Agencies.

UNIT III INTER-RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT              9
Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc.- Climate Change Adaptation- IPCC Scenario and Scenarios in the context of India - Relevance of indigenous knowledge, appropriate technology and local resources.

UNIT IV DISASTER RISK MANAGEMENT IN INDIA                                                   9
Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, Disaster Management Act and Policy - Other related policies, plans, programmes and legislation – Role of GIS and Information Technology Components in Preparedness, Risk Assessment, Response and Recovery Phases of Disaster – Disaster Damage Assessment.

UNIT V DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES AND FIELD WORKS                                                                                                                     9
Landslide Hazard Zonation: Case Studies, Earthquake Vulnerability Assessment of Buildings and Infrastructure: Case Studies, Drought Assessment: Case Studies, Coastal Flooding: Storm Surge Assessment, Floods: Fluvial and Pluvial Flooding: Case Studies; Forest Fire: Case Studies, Man Made disasters: Case Studies, Space Based Inputs for Disaster Mitigation and Management and field works related to disaster management.

OUTCOMES:
The students will be able to
- Differentiate the types of disasters, causes and their impact on environment and society
- Assess vulnerability and various methods of risk reduction measures as well as mitigation.
- Draw the hazard and vulnerability profile of India, Scenarious in the Indian context, Disaster damage assessment and management.

TEXT BOOKS:
OBJECTIVES:
- To impart knowledge on defects and control systems.
- To impart knowledge on controls in knitted and woven fabric.
- To impart knowledge on process control in garment production process and its properties.

UNIT I

UNIT II
Process control in knitting – quality control of knitted fabrics, loop length control, common faults in knitted fabrics, control measures.

UNIT III
Process control in weaving –fabric quality, on line process control, quality control and monitoring.

UNIT IV
Process control - spreading, pattern making, cutting, process control in sewing, causes of damage to fabric during sewing, control of fusing and pressing operations, storage and packaging.

UNIT V
Sewability of fabrics, strength properties of apparel, dimensional changes in apparel due to laundering, dry-cleaning, steaming and pressing, quality control in printing, embroidery, washing and other accessories.

OUTCOMES:
Upon completion of this course, students shall able to know about,
- Defects and control systems
- Controls in knitted and woven fabric
- Process control in garment production process and its properties

TEXT BOOKS:

REFERENCES:
OBJECTIVES:
- To educate on principles of photography. Different techniques and lighting methods
- To educate on different types of photography equipments. Photography for different media, printing techniques.
- To impart knowledge on videography and computer applications in photography.

UNIT I

UNIT II
Image capture – parts of camera - classification and types of camera – Applications Disadvantages. Light – Natural, artificial, flash and strobe.

UNIT III
Photography techniques and equipment for different fields. Basic, studio, location portraiture, Photojournalism, Fashion Photography, Fashion shows.

UNIT IV
Exposure and processing of colour and black and white films. Different techniques in developing. Printing – definitions – Methods of printing for black & white color.

UNIT V

TOTAL: 45 PERIODS

OUTCOMES:
The students would have enhanced their knowledge on
- Different photography techniques and equipments.
- Different printing techniques.

TEXT BOOK:

REFERENCES:
OBJECTIVES:

- To impart knowledge on fashion forecasting and trend prediction.
- To impart knowledge on fashion merchandising, branding and visual merchandising.
- To impart knowledge on fashion press, shows, entrepreneur and promotional activities.

UNIT I
The fashion forecasting industry, process, trend prediction as a tool, presenting trend information, forecasting agencies.

UNIT II
Fashion buying, merchandising, retail formats, retail calendar, importing fashion goods.

UNIT III
Fashion communication, fashion consumer, branding, fashion marketing, fashion promotion, visual merchandising, fashion advertising.

UNIT IV
Fashion calendar, fashion press, fashion editorial, trade shows and events.

UNIT V
Fashion entrepreneur, setting up business, creating business planning, branding basics, innovative marketing and promotion.

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course, students shall able to know about,
- fashion forecasting and trend prediction,
- fashion merchandising, branding and visual merchandising and
- fashion press, shows, entrepreneur and promotional activities

TEXT BOOKS:

REFERENCES:
Characteristic requirements of fibre, yarn and fabric for flame proof, heat resistant, ballistic resistance, electrical conduction, bacterial protection, radiation protection and radiation contamination protection

UNIT II       CHEMICAL FINISHES FOR PROTECTIVE GARMENTS          5
Mechanism, Chemistry, Materials and methods - Flame retardant, Liquid repellent, Antistatic, Antibacterial, UV protection and mite protection finishes

UNIT III       PROTECTIVE GARMENTS IN DIFFERENT APPLICATIONS    9
Protective fabrics used in the medical field and in hygiene; military combat clothing; protective fabrics against biological and chemical warfare; textiles for high visibility; antigravity suit

UNIT IV       PROTECTIVE GARMENT CONSTRUCTION               9
Garment construction - method of construction of garments according to various protective end uses; use of accessories for protective garment; ergonomics of protective clothing

UNIT V       EVALUATION OF PROTECTIVE GARMENTS               9
Standards and test method for protective fabric performance - flame retardant finishes, liquid repellent finishes, antistatic, liquid repellent, antibacterial, UV protection, mite protection; manikins-thermal manikins, segmented thermal manikins; evaporative resistance measurement-moisture permeability index, skin model; concept of dynamic manikins; permeation resistance test-index of penetration and index of repellency; liquid tight integrity and gas tight integrity

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of the course, the students shall
- Select fibres, yarns and fabrics for different protective applications
- Construct protective garments
- Evaluate protective garments

TEXT BOOKS:

REFERENCES:
FT8008 APPAREL SIZE AND FIT ANALYSIS L T P C

3 0 0 3

OBJECTIVE:
- The course is aimed at providing an overview of sizing system and its impact on the fit of the constructed silhouettes.

UNIT I
Anthropometry; Study of body measurements – infants, children’s, women’s and men’s. perception of body appearance; figure analysis; body ideals; height and weight distributions; body proportions.

UNIT II
History of sizing system; creating sizing system. Sizing standardization-numbered, lettered sizing-Men’s, Women’s and Children’s. Methods of sizing for mass production of clothing for men, women. Mass customization-sizing technologies and application.

UNIT III

UNIT IV

TOTAL: 45 PERIODS

OUTCOME:
- The students would develop an understanding of the complex issue of sizing and overall garment appearance

TEXT BOOKS:

REFERENCES:
OBJECTIVES:
To enable the students to learn about
- Various operations research (OR) methods that can be applied in the textile industry
- Designing of OR problem related to textile industry
- Method of solving OR problems

UNIT I
Scope of operation research, applications, limitations; linear programming problems –
construction, solutions by graphical method, simplex method, Big M method; sensitivity analysis;
application of LP technique for mixing optimization in spinning mill

UNIT II
Transportation problem – construction, initial basic feasible solution – North West Corner rule,
lowest cost entry method, Vogel’s Approximation Method; optimality test - … method, stepping
stone method; replacement analysis

UNIT III
Assignment problem – construction, solution by Hungarian method, application in textile industry;
sequencing problems; integer programming – construction, solving by cutting plane method

UNIT IV
Decisions theory - decisions under assumed certainty, decision under risk, decision under
uncertainty, illustrations from textile industry; inventory control - EOQ models-deterministic models
–probabilistic models, simulation theory, models, queuing system.

UNIT V
Project planning and control models: CPM, PERT – network representation, determining critical
path, project duration; crashing of project duration; resource leveling

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of the course, the students will be able to
- Design operations research problems that can be applied to textile industry.
- Solve the OR problems

TEXT BOOKS:

Pvt. Ltd., 2006
5. Srivastava U.K., Shenoy G.V., Sharma S. C., "Quantitative Techniques for Managerial
OBJECTIVES:

- To acquaint student on the design, material, accessories and sewing aspects of intimate garments

UNIT I
Intimate apparels – Definition, classification, materials-fiber, fabric and accessories; physical and physiological requirements of intimate apparels

UNIT II
Design analysis, measurements, pattern drafting of men’s intimate apparel – Long johns, tank top, tanga, boy shorts, knickers, bikini underwear, thong, boxer briefs, boxer shorts and jock strap.

UNIT III
Design analysis, measurements, pattern drafting of women’s intimate apparel – waist petticoats, panties, camisoles, tube top, shape wear, bikini and bra.

UNIT IV
Intimate apparel accessories - Bra wire, hook and eye tape, ring and slider, buckle, plastic bone, elastics and sewing threads

UNIT V
Sewing of intimate apparels - seams, stitches, machines; lamination; moulding and welding technique.

TOTAL: 45 PERIODS

OUTCOME:

- Upon completion of this course, the students will have the skills essential to design and develop intimate apparels

TEXT BOOKS:

REFERENCES:

OBJECTIVE:

- To give an idea about IPR, registration and its enforcement.
UNIT I       INTRODUCTION
Introduction to IPRs, Basic concepts and need for Intellectual Property - Patents, Copyrights, Geographical Indications, IPR in India and Abroad – Genesis and Development – the way from WTO to WIPO –TRIPS, Nature of Intellectual Property, Industrial Property, technological Research, Inventions and Innovations – Important examples of IPR.

UNIT II      REGISTRATION OF IPRs
Meaning and practical aspects of registration of Copy Rights, Trademarks, Patents, Geographical Indications, Trade Secrets and Industrial Design registration in India and Abroad

UNIT III     AGREEMENTS AND LEGISLATIONS

UNIT IV      DIGITAL PRODUCTS AND LAW

UNIT V       ENFORCEMENT OF IPRs
Infringement of IPRs, Enforcement Measures, Emerging issues – Case Studies.

OUTCOME:
• Ability to manage Intellectual Property portfolio to enhance the value of the firm.

TEXT BOOKS:
2. S. V. Satakar, "Intellectual Property Rights and Copy Rights, Ess Ess Publications, New Delhi, 2002

REFERENCES:

GE8076     PROFESSIONAL ETHICS IN ENGINEERING
L T P C
3 0 0 3

OBJECTIVE:
• To enable the students to create an awareness on Engineering Ethics and Human Values, to instil Moral and Social Values and Loyalty and to appreciate the rights of others.

UNIT I     HUMAN VALUES

**UNIT II ENGINEERING ETHICS**

**UNIT III ENGINEERING AS SOCIAL EXPERIMENTATION**
Engineering as Experimentation – Engineers as responsible Experimenters – Codes of Ethics – A Balanced Outlook on Law.

**UNIT IV SAFETY, RESPONSIBILITIES AND RIGHTS**

**UNIT V GLOBAL ISSUES**

**TOTAL: 45 PERIODS**

**OUTCOME:**
- Upon completion of the course, the student should be able to apply ethics in society, discuss the ethical issues related to engineering and realize the responsibilities and rights in the society.

**TEXT BOOKS:**

**REFERENCES:**

**Web sources:**
1. www.onlineethics.org
FT8072                      RETAIL MANAGEMENT AND VISUAL MERCHANDISING                        L T P C
                                                                                          3 0 0 3

OBJECTIVES:
 To introduce the students, the fashion business segments, retail management concepts
 To acquaint the students with fashion communication tools

UNIT I
Retailing, current global and Indian retail scenario in garment and fashion, key drivers of Indian
apparel retail business, growth of organised apparel retail in India; understanding the Indian retail
economics, foreign direct investment in Indian apparel retail.

UNIT II
Operational excellence, customer service strategies, pricing strategies, inventory levels and
merchandise availability as a strategy, case studies on Indian and International retail stores, retail
business formats, retail management information system

UNIT III
Objectives of store planning, location, design, retail image mix, layout plan for retail stores. Buying,
mark-up and mark-down in merchandise management, private labels; apparel franchising- types,
Key success factors

UNIT IV
Visual merchandising as a communication tool, presentations in visual merchandising, visual
merchandising and enhanced customer buying decision, interiors with respect to brand, sensory
elements, signs and graphics, focal point for season and type of sale; case studies on visual
merchandising

UNIT V
An introduction to fashion e-commerce, apparel and fashion e-business, s-commerce vs.
ebusiness, economic forces – advantages – myths – e-business models, design, develop and
management of e-business, web and social networking, mobile commerce - business applications,
classifications, and models, payments, security and legal requirements

OUTCOMES:
Upon completion of the course, the student shall know
 The concept of retail management
 The concept of visual merchandizing
 e-commerce, s-commerce

TEXT BOOKS:
3. Harvey M.Deitel., Paul J.Deitel., and Kate Steinbuhler., “e-business and e-commerce for
REFERENCES:

TT8091     CLOTHING COMFORT

OBJECTIVES:
To enable the students to learn about the
• Important characteristics of the fabric responsible for its comfort properties and
• Different phenomena which take place in the fabric related to the comfort properties of the fabric

UNIT I
Comfort – types and definition; human clothing system, comfort perception and preferences

UNIT II
Psychological comfort; neuro-physiological comfort-basis of sensory perceptions; measurement techniques - mechanical stimuli and thermal stimuli

UNIT III
Thermo physiological comfort – thermoregulatory mechanisms of the human body, role of clothing on thermal regulations

UNIT IV
Heat and moisture transfer – moisture exchange, wearer’s temperature regulations, effect of physical properties of fibres, behaviour of different types of fabrics

UNIT V
Fabric tactile and mechanical properties - fabric prickliness, itchiness, stiffness, softness, smoothness, roughness, and scratchiness; predictability of clothing comfort performance

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course, the student shall be able to
• Understand different phenomena such as perception of comfort, fabric mechanical properties and, heat and moisture interaction and
• Correlate the property of the fabric with comfort to the wearer

TEXT BOOKS:
REFERENCES:

FT8010 TEXTILE AND APPAREL EXIM MANAGEMENT L T P C
3 0 0 3

OBJECTIVE:
- To give the students an exposure on international market for textile products, regulations with respect to export and import of textiles.

UNIT I
International markets for yarns, woven fabrics; international market for cotton, silk, jute, wool and other fibres; export and import of textiles by India – current status, promotional activities

UNIT II
International markets for carpets and home textiles – product types, market potential and statistics, India - current status and promotional activities, role of export promotional councils

UNIT III
International markets for woven piece goods, knitted garments, leather garments; statistics of international apparel market and trade; export incentives, role of AEPC, CII, FIEO, Textile Committee

UNIT IV
Marketing – strategies, global brand building; logistics & SCM; role of export finances & EXIM banking, ECGC, Indian council of arbitration, FERA; impact of foreign trade on Indian economy

UNIT V
Exim policy - customs act, acts relating to export/import of textile and apparel; Indian customs formalities - export documentation for excisable goods, import documentation, clearance of import goods; concepts - 100% export oriented units, export processing zones, special economic zones; duty drawback procedure; import/export incentives; licenses; case study

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of the course, the students shall have the knowledge on
- International market for textile products
- Global marketing strategies and
- EXIM policy and procedures

TEXT BOOKS:
REFERENCES:

GE8077 TOTAL QUALITY MANAGEMENT L T P C
3 0 0 3

OBJECTIVE:
- To facilitate the understanding of Quality Management principles and process.

UNIT I INTRODUCTION 9

UNIT II TQM PRINCIPLES 9
Leadership - Quality Statements, Strategic quality planning, Quality Councils - Employee involvement - Motivation, Empowerment, Team and Teamwork, Recognition and Reward, Performance appraisal - Continuous process improvement - PDCA cycle, 5S, Kaizen - Supplier partnership - Partnering, Supplier selection, Supplier Rating.

UNIT III TQM TOOLS AND TECHNIQUES I 9
The seven traditional tools of quality - New management tools - Six sigma: Concepts, Methodology, applications to manufacturing, service sector including IT - Bench marking - Reason to bench mark, Bench marking process - FMEA - Stages, Types.

UNIT IV TQM TOOLS AND TECHNIQUES II 9
Quality Circles - Cost of Quality - Quality Function Deployment (QFD) - Taguchi quality loss function - TPM - Concepts, improvement needs - Performance measures.

UNIT V QUALITY MANAGEMENT SYSTEM 9

TOTAL: 45 PERIODS

OUTCOME:
- The student would be able to apply the tools and techniques of quality management to manufacturing and services processes.
TEXT BOOK:

REFERENCES:
4. ISO9001-2015 standards

TT8078 PRODUCTION AND APPLICATION OF SEWING THREADS L T P C
3 0 0 3

OBJECTIVE:
- To enable the students to understand the requirements and production of sewing threads for different applications

UNIT I
Sewing threads – property requirements for different applications; ticket numbering; characterization of sewing threads; sewability of the thread, seam efficiency index

UNIT II
Types of sewing thread – spun threads, core spun threads, filament threads; production, properties and applications; fancy yarns – types and production; metallic yarns

UNIT III
Characteristics and application of high performance sewing threads - aramid threads, ceramic threads, polypropylene threads, polyethylene threads, polytetrafluoroethylene threads, fibreglass threads, other sewing threads – tencel, acrylic, linen, elastic, soluble; embroidery threads

UNIT IV
Sewing defects related to sewing threads – Assessment and control

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of the course, the students will be able to understand the
- Production of sewing thread
- Characterization of sewing thread and
- Selection of sewing thread for different end uses.

TEXT BOOKS:

REFERENCES:

TT8076 HOME TEXTILES

OBJECTIVES:
- To enable the students to learn about the
- Recent developments in furnishing, floor covering and other home textile products Various kinds of materials used in home textile.

UNIT I FURNISHINGS
Developments in Textile Furnishing; Type of Furnishings Materials – Woven and non-woven; Factors affecting selection of Home Furnishings.

UNIT II FLOOR COVERINGS
Recent Developments in manufacturing of floor coverings -Hard Floor Coverings, Resilient Floor Coverings, Soft Floor Coverings, Rugs, Cushion and Pads; Care of floor coverings.

UNIT III CURTAINS AND DRAPERIES

UNIT IV HOME FURNISHING
Advances in period style in, Different styles, and use of Colours, design & texture in home furnishing. Developments in living room furnishing including upholstery, Wall Hangings, Cushion, Cushion Covers, Bolster and Bolster Cover.

UNIT V BED LINENS
Advances in the production of - Different Types of Bed Linen, Sheets, Blankets, Blanket Covers, Comforts, Comfort Covers, Bed Spreads, Mattress and Mattress Covers, Pads, Pillows.

OUTCOMES:
Upon completion of this course, the student shall be able to
- Know about different types of home textiles
- Understand the production method of different types of home textile products

TEXT BOOKS:
REFERENCES:

OBJECTIVE:
To sensitize the Engineering students to various aspects of Human Rights.

UNIT I

UNIT II

UNIT III
Theories and perspectives of UN Laws – UN Agencies to monitor and compliance.

UNIT IV
Human Rights in India – Constitutional Provisions / Guarantees.

UNIT V

TOTAL: 45 PERIODS

OUTCOME:
Engineering students will acquire the basic knowledge of human rights.

REFERENCES:

OBJECTIVES:
To understand the global trends and development methodologies of various types of products and services
To conceptualize, prototype and develop product management plan for a new product based on the type of the new product and development methodology integrating the
hardware, software, controls, electronics and mechanical systems

- To understand requirement engineering and know how to collect, analyze and arrive at requirements for new product development and convert them into design specifications.
- To understand system modeling for system, sub-systems and their interfaces and arrive at the optimum system specifications and characteristics.
- To develop documentation, test specifications and coordinate with various teams to validate and sustain up to the EoL (End of Life) support activities for engineering customer.

UNIT I  FUNDAMENTALS OF PRODUCT DEVELOPMENT  9

UNIT II  REQUIREMENTS AND SYSTEM DESIGN  9

UNIT III  DESIGN AND TESTING  9

UNIT IV  SUSTENANCE ENGINEERING AND END-OF-LIFE (EOL) SUPPORT  9

UNIT V  BUSINESS DYNAMICS – ENGINEERING SERVICES INDUSTRY

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of the course, the students will be able to:
- Define, formulate and analyze a problem
- Solve specific problems independently or as part of a team
- Gain knowledge of the Innovation & Product Development process in the Business Context
- Work independently as well as in teams
- Manage a project from start to finish

TEXTBOOKS:
1. Book specially prepared by NASSCOM as per the MoU.

REFERENCES:

FT8011 APPAREL ENTREPRENEURSHIP

OBJECTIVE:
- Study of this subject provides an understanding of the scope of an entrepreneur, key areas of development, financial assistance by the institutions, methods of taxation and tax benefits.

UNIT I ENTREPRENEURSHIP

UNIT II MOTIVATION
Major Motives Influencing an Entrepreneur – Achievement Motivation Training, self Rating, Business Game, Thematic Apperception Test – Stress management, Entrepreneurship Development Programs – Need, Objectives.

UNIT III BUSINESS

UNIT IV FINANCING AND ACCOUNTING

UNIT V SUPPORT TO ENTREPRENEURS

TOTAL: 45 PERIODS

OUTCOME:
- The students will have confidence and entrepreneurial skills essential for the successful launch and scaling-up of an enterprise
TEXT BOOKS:

REFERENCES:

TT 8851  BONDED FABRICS  L T P C
3 0 0 3

OBJECTIVES:
To enable the students to learn about the
- Fundamentals of bonded fabrics
- Different method of web formation and bonding

UNIT I  FUNDAMENTALS OF BONDED FABRICS  5
Definitions and classification of bonded fabrics; fibres, fibre preparations and their characteristics for the production of bonded fabrics, uses; methods of bonded fabric production

UNIT II  WEB FORMATION WITH STAPLE FIBRES  9
Production of staple-fibre web by dry and wet methods; influence of web laying methods on fabric properties; quality control of web

UNIT III  MECHANICAL, CHEMICAL AND THERMAL BONDING  13
Bonded fabric production by mechanical bonding - needling, stitching, water jet consolidation; Thermal Bonding technologies; Chemical bonding – Binder polymers and bonding technologies

UNIT IV  POLYMER – LAID WEB AND FABRIC FORMATION  9
Manufacture of Spun bonded fabrics, fibre orientation in spun bonded fabrics and characterization of filament arrangement; Manufacture of Melt blown fabrics – fibre formation and its attenuation; Effect of processing parameters on fabric characteristics

UNIT V  FINISHING AND APPLICATION OF BONDED FABRICS  9
Dry and Wet finishing; Characterization, structure - property relationship in bonded fabrics; End uses of bonded fabrics

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of the course the student will be able to
- Explain different types of nonwovens and their method of production
- Explain different type of finishes applied on the fabric and their end uses
- Choose appropriate bonded technique for getting desired properties in fabric.

TEXT BOOKS:

REFERENCES:

GE8073                  FUNDAMENTALS OF NANOSCIENCE
L T P C
3 0 0 3

OBJECTIVE:
• To learn about basis of nanomaterial science, preparation method, types and application

UNIT I   INTRODUCTION                                           8
Nanoscale Science and Technology- Implications for Physics, Chemistry, Biology and Engineering-Classifications of nanostructured materials- nano particles- quantum dots, nanowires-ultra-thinfilms-multilayered materials. Length Scales involved and effect on properties: Mechanical, Electronic, Optical, Magnetic and Thermal properties. Introduction to properties and motivation for study (qualitative only).

UNIT II            GENERAL METHODS OF PREPARATION                                                   9
Bottom-up Synthesis-Top-down Approach: Co-Precipitation, Ultrasonication, Mechanical Milling, Colloidal routes, Self-assembly, Vapour phase deposition, MOCVD, Sputtering, Evaporation, Molecular Beam Epitaxy, Atomic Layer Epitaxy, MOMBE.

UNIT III   NANOMATERIALS                                                    12

UNIT IV         CHARACTERIZATION TECHNIQUES                                                   9

UNIT V         APPLICATIONS                                                      7

TOTAL: 45 PERIODS
OUTCOMES:
- Will familiarize about the science of nanomaterials
- Will demonstrate the preparation of nanomaterials
- Will develop knowledge in characteristic nanomaterial

TEXT BOOKS:

REFERENCES:

FT8012 FABRIC SOURCING AND SAMPLING L T P C
3 0 0 3

OBJECTIVES:
- To impart knowledge on sample preparation, types of samples and its quality requirements.
- To impart knowledge on raw material sourcing and sourcing concepts.

UNIT I
Sample Construction: Construction of sample - basic standard of professional sewing; relationship between pattern making and the ultimate quality of finished sample; analysis of component pieces and trimmings - planning a logical garment construction sequence – economic use of fabric yardage - maintaining grain lines - interfacing, lining

UNIT II
Sampling: Types of samples – pro – photo type – fit – pre-production – top – shipment – gold sealed – sales man samples etc., need and importance of the samples – quality requirements – sampling and lead time – sampling and costing – approvals

UNIT III
Introduction to Sourcing: Procurement and outsourcing in the fashion industry - benefits and risks of outsourcing - searching, evaluating, and maintaining sources of supply - make-buy decisions - single-multiple sourcing decisions - domestic-global sourcing decisions

UNIT IV

UNIT V

TOTAL: 45 PERIODS

OUTCOMES:
Upon completion of this course, students shall able to know about,

- Sample preparation, types of samples and its quality requirements
- Raw material sourcing and sourcing concepts

TEXT BOOKS:

REFERENCES:

UNIT I  INTRODUCTION
Role of Logistics and Supply chain Management: Scope and Importance- Evolution of Supply Chain - Decision Phases in Supply Chain - Competitive and Supply chain Strategies – Drivers of Supply Chain Performance and Obstacles.

UNIT II  SUPPLY CHAIN NETWORK DESIGN

UNIT III  LOGISTICS IN SUPPLY CHAIN
Role of transportation in supply chain – factors affecting transportation decision – Design option for transportation network – Tailored transportation – Routing and scheduling in transportation.

UNIT IV  SOURCING AND COORDINATION IN SUPPLY CHAIN
Role of sourcing supply chain supplier selection assessment and contracts- Design collaboration - sourcing planning and analysis - supply chain co-ordination - Bull whip effect – Effect of lack of co-ordination in supply chain and obstacles – Building strategic partnerships and trust within a supply chain.

UNIT V  SUPPLY CHAIN AND INFORMATION TECHNOLOGY
The role IT in supply chain- The supply chain IT frame work Customer Relationship Management – Internal supply chain management – supplier relationship management – future of IT in supply
OUTCOME:

- The student would understand the framework and scope of supply chain networks and functions.

TEXT BOOK:

REFERENCES:

FT8013 FASHION FORECASTING L T P C
3 0 0 3

OBJECTIVE:

- To impart knowledge on principles marketing, marketing research. Domestic and international market.

UNIT I 9
Fashion market and marketing environment – market research – evaluating the collections - Fashion consumer – Consumer influence on market.

UNIT II 9
Fashion, Fad, style – Application – Society Fashion and individual fashion – their Coordination - wardrobe.

UNIT III 9
Applied illusions – Physical effects- Overall height - over all weight – Covering body defects by design – Visual design in Dress in Australia - Brazil – Germany - India – Japan - Nigeria.

UNIT IV 9
Fashion marketing research – Purpose of research - research design & data sources – Sampling methods – data Collection – Forecasting Fashion – Market Segmentation - marketing mix.

UNIT V 9

OUTCOME:

- The students will have understanding on principles of marketing, factors affecting domestic and international market, fashion trends and consumer behaviour.

TEXT BOOKS:

OBJECTIVE:
- To enable the students understand the conceptualisation of design, design development, portfolio development and garment production

UNIT I
